

# MAGNET AXIOM™

## A Complete Digital Investigation Platform

Recover digital evidence from the most sources, including smartphones, cloud services, computers, IoT devices, and third-party images. Use powerful and intuitive Analytics tools to easily analyze all evidence data in one case file.

### MOBILE

Every case needs to analyze and review mobile data. With AXIOM, you can find more pictures, chat, and browser history from iOS and Android devices. And with its robust reporting capabilities, you can easily present findings to non-technical stakeholders — such as rebuilt chat history — that will help them piece together the evidence.

Recover and analyze data from many encrypted applications such as Snapchat and Wickr. AXIOM can also ingest data from other tools for analysis, including Cellebrite, Oxygen, GrayKey, and more.

And with the integration of GrayKey directly into AXIOM, you can quickly and easily load GrayKey images for analysis directly from AXIOM.

### COMPUTER

AXIOM provides the most comprehensive and powerful recovery, analysis, and reporting tools for PCs and Macs. Allowing you to recover the most artifacts like browser history, chats, pictures, and much more.

Use powerful and intuitive features within AXIOM—like Connections and Timeline— to immediately focus on the most relevant data, enabling you to work your case faster and save hours in the end.

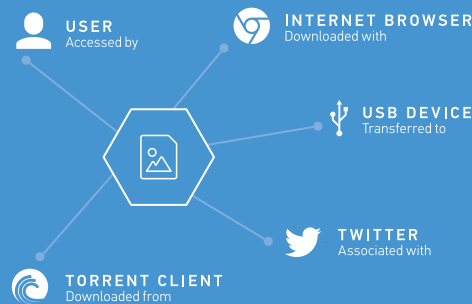

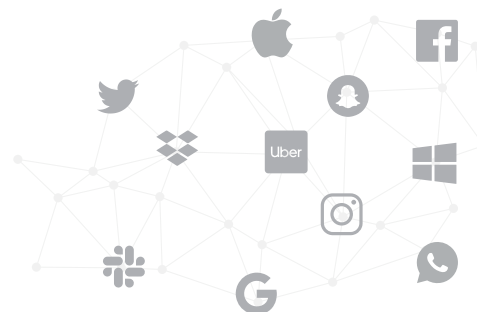

And if you're taking advantage of the benefits of memory analysis, make sure to simplify the process with Volatility integrated directly in AXIOM.

### CLOUD

Data from cloud services and social networks are a critical source of evidence that can help strengthen your investigation. Examiners need to rely on device back-ups, chat history, social media, and account information stored in the cloud to round out their investigations.

Use AXIOM to access evidence not only from suspects, but also consenting victims and witnesses.

Process warrant returns from Google, Apple, Facebook, Instagram, Snapchat, and Skype. Acquire public-facing data from Twitter and ingest user-requested archive files from Facebook, Google, and Skype.

# MAGNET AXIOM™

AXIOM's advanced parsing and carving techniques get the most data from each evidence source. Data can be presented in a clear and direct way with easy reporting on the results. Plus, built-in Analytics features like Connections, Timeline, and Magnet.AI automatically generate insights that could lead to important breakthroughs in your examinations

## RECOVER EVIDENCE FROM THE MOST SOURCES

- Acquire images from locked and unlocked iOS devices using GrayKey and easily ingest them with AXIOM — giving you the most advanced solution for iOS devices.
- Bypass passwords on thousands of Android models with exploits and advanced extraction capabilities.
- Recover evidence from Windows-based computers and Macs.
- Retrieve data from 50+ of the most popular cloud services including iCloud, Google, Facebook, WhatsApp, Twitter, Instagram and more--including additional support for cloud services like publicly available Twitter information, warrant returns from six different providers including Apple and Facebook, and user-request data from Facebook, Google, and Skype.

## SURFACE THE MOST RELEVANT DATA

- AXIOM's artifacts-first approach brings the most relevant data and artifacts to the surface—saving you time and effort.
- Advanced parsing and carving techniques recover the deepest artifact data from 1000+ artifacts.
- Industry-leading discovery of chat, picture, browser history, and location data.
- Discover more macOS artifacts with AXIOM such as AirDrop, Live Photos, KTX files, and iCloud Tabs.
- Enhance investigations with recovery and analysis of memory artifacts with Volatility integrated in AXIOM.

## WORK YOUR INVESTIGATIONS FASTER

- Use powerful Analytics tools like Connections to automatically show relationships between artifacts, files, and people and Timeline to present evidence on a visual timeline that immediately tells a story.
- Magnet.AI leverages machine learning and content-based image retrieval (CBIR) to search pictures and flag potential CSAM, nudity, weapons, drugs, and more; Magnet.AI .
- Case Dashboard immediately identifies key areas of interest and kicks-off investigations with one click.
- Detailed Scan Summary and Error Reporting provides the information needed to proceed with confidence, improving the defensibility and reproducibility of examinations.
- AXIOM's flexible Exports allow you to choose the data that is most relevant to your case to be included in your report, and with Export Templates you can improve the efficiency and consistency of reporting agency-wide.
