

# XAMN

## Pro

XAMN Pro revolutionizes mobile forensic analytics, offering an advanced and intuitive solution that expedites data discovery and analysis with enhanced precision.

Whether your mission is to gather and report intelligence, prevent crime or quickly produce solid evidence – the powerful and intuitive XAMN Pro gives you the fastest and most efficient route from raw data acquisition to the identification, analysis, and reporting of crucial insights.

It's designed to make your life easier. And it succeeds.

Discover evidence and intelligence

Analyze and visualize data

Create reports and share findings

Project VIC/CAID compliant

## Rapid Analysis, Credible Reports

An intuitive and extremely powerful review and analysis tool that provides unprecedented search, linking, and filtering options that enables investigators, analysts and digital examiners to quickly discover evidence in mobile data. XAMN Pro simplifies and speeds up your work and is the tool of choice for anything from review of pictures and messages to advanced hex carving. XAMN Pro also includes extensive options for reporting and exports.

## Work smarter, not harder

XAMN Pro excels as the ultimate digital forensic analysis tool, providing superior capabilities in efficiently processing and contextualizing large data sets. With XAMN Pro, cross-examining data from diverse devices and individuals becomes seamless, facilitating seamless sharing with relevant stakeholders.

## Investigation Reports Made Easy

The functionality of XAMN Pro enables digital investigators to effectively organize their discoveries, generate precise and pertinent reports containing all the necessary and admissible evidence, in compliance with legal proceedings. You have two main ways to create reports in XAMN Pro:

### Report Builder

With the "Report Builder" feature in XAMN Pro, you can effortlessly construct standardized templates for use within your department using drag and drop technology. These templates can be utilized within your department to produce professional, accurate, and personalized court presentation reports. Templates can be shared to unify your reports.

### Tailor-made templates

Utilize pre-designed templates that allow you to conveniently incorporate your forensic work into the program. You can include details such as chain of custody, persons involved, evidence and instrumentation descriptions, analysis statements and conclusions. You obtain a comprehensive and well-structured digital forensics report.

### Features

- Wide range of export formats
- Exhaustive filtering options
- Third Party Tool Support
- Timeline, Geographic, connection and person views
- Warrant and Personal Detail imports

### Tools

- Python integration
- Indexed search functionality
- AI-based filter to automatically categorize images as weapons, drugs, and more
- Advanced Report Builder
- Advanced Hex carving
- Comprehensive tagging functionality

### Minimum requirements

*For the full list of recommended specifications, see [MSAB.com/XAMN](https://www.msab.com/XAMN)*

- Intel 6th Generation (Core i3 or above) processor, 16GB RAM
- 200 MB space for installation
- 500 GB space for data storage
- Windows 10
- 1600 x 900 resolution
- Microsoft .NET Framework 4.7.2
