

Motivate students to read (and read more!)

Beanstack helps educators build a culture of reading in their schools and districts through the power of reading challenges. Many common reading programs focus too heavily on assessments, which can discourage students and make reading less enjoyable. With Beanstack's reading challenges, educators can encourage independent, choice reading time - the number one way to build strong readers.

How Beanstack Helps

Beanstack motivates students to read and gives teachers and librarians tools to understand and grow students' reading habits.

Reading Challenges

You can participate in national reading challenges, choose from a library of challenge templates, create your own custom challenges, or all of the above.

Log Reading

Students can log books, minutes, pages, or complete activities and responses. They earn badges, see stats, and compete for a spot on the leaderboard to keep them engaged along the way.

Data & Reporting

Beanstack includes an insights dashboard and robust on-demand reporting, allowing you to keep track of students' reading activity and interests, and observe data trends.

More to Love about Beanstack

Beanstack is the best for reading challenges. We've reimaged the way educators and students participate in reading challenges - and it keeps getting better. Check out these features educators love:

User Friendly Web & Mobile App

Students can log reading on the Beanstack web app (great for school devices like laptops/tablets) or mobile app, with added features like an ISBN scanner.

Integrated Sign-In Options

Beanstack integrates with leading SSO and rostering options, like Clever and Classlink, allowing your students to log in seamlessly and securely.

Easy Import Reading Logs

Beanstack imports data from select eBook platforms with just a few clicks, allowing students to easily log the reading they've completed online.

Friends & Leaderboard

Students can participate in reading challenges with their friends, view how many minutes each friend has read, and discover new titles by viewing their friends' reading logs.

Tandem Library Accounts

Many students already use Beanstack at their local public library. We make it easy for parents to link the accounts, and keep them reading all year long.

Professional Development

All educators are eligible to join regular Beanstack training events, webinars, private client community, and complete our educator certification program.
