

Whitehots Leasing Program

Bestsellers on Demand

Whitehots offers a leasing program customized to your library's needs, with the option of combining purchase and lease.

Our leasing program can be combined with an Automatic Release Program. Lease additional copies to satisfy initial demands.

Collaborate with our team to design a plan that works for your library. Choose titles from our lists, or make your own selections.

For over 30 years, Whitehots has been a strong supporter of Canadian authors & publishers. Our leasing program will supply Canadian editions of all bestsellers where applicable.

Whitehots has provides many libraries with a Bestseller Plan. Libraries receive bestsellers as close to the publisher's on-sale date as possible.

Our Leasing Plan does not include allotments, allocations or share. Our simple, more efficient plan deals with real dollars and provides more value for your leasing dollar.

The cost to your library would be based on a variable discount. Whitehots would be responsible for a monthly pick-up and disposal of the leased material after the lease period has expired.

A new lease account would be set up to monitor the plan. Invoices would be sent out monthly. The material would be eligible for return after six months and within one year. These times are negotiable. A monthly report would track delivery and return dates. You have the option to keep any leased books as part of your permanent collection.
