

Practical Solutions. Professional Advice.

Halifax Offshore Consulting is a leading provider of professional services to Nova Scotia's tidal energy industry. We are passionate about both the technologies and the opportunities they hold for environmental and economic benefits in Canada and internationally.

Halifax Offshore Consulting provides strategic advice and helps developers navigate the regulatory requirements using our experience in a variety of projects to minimize time and cost. A key part of both the technical and operational components of any tidal energy project is the development of effective and efficient marine operation plans. Halifax Offshore Consulting has provided marine operations planning for a variety of technologies and projects in the Bay of Fundy for leading Canadian and European developers.

With our partners, Halifax Offshore Consulting provides complete in-stream tidal and river energy marine operations planning, consulting, and turnkey projects. We deliver custom solutions and advice for projects of any size or application and deliver results by understanding your goals and objectives.

Our dynamic team has over 20 years of experience in the energy, marine and oil and gas sectors across multiple disciplines. We are dedicated to helping clients and communities build successful projects safely, that is commercially, environmentally, and socially viable.
