

★ Community expresses interest in ORPC solution

★ Community and ORPC agree to spend time on project validation

- Measure velocity and depth of target area
- Collect data on electrical grid infrastructure, demand and consumption
- Evaluate environmental regulations and local challenges
- Prepare preliminary economic analysis

★ Both parties agree to move forward with project

- Perform in-depth analysis of velocity and river-bottom soil characteristics
- Determine specific mooring and power cable specifications
- Develop plan for integrating into local grid
- Conduct environmental studies and establish permitting process
- Present community with final project cost and installation timeline

★ Signed contract
