McKesson

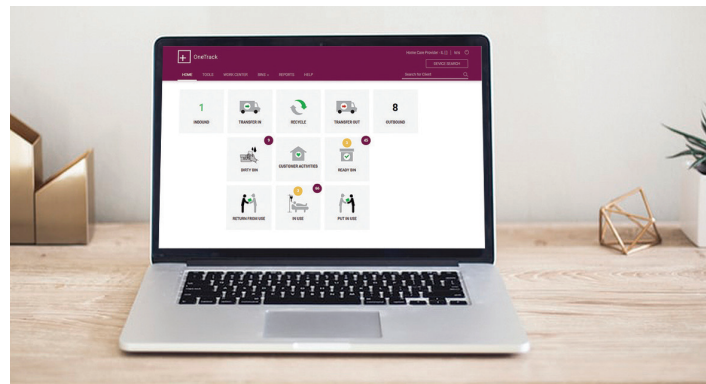

The most efficient way  
to manage your assets.

McKesson OneTrack™

# Better tracking for devices means better treatment for patients.

When patients need critical care, every second matters. Tracking down equipment, such as infusion and feeding pumps, takes time – and can take away from quality care and patient satisfaction. Manage your devices with McKesson OneTrack™, a web-based system that tracks your assets, while providing details to help improve operation efficiency.

Automated inventory levels can help improve use of existing equipment, reducing unnecessary rentals and purchasing of extra inventory.

## Visual analytics

Manage asset utilization, preventative maintenance, recall management and inventory status from a convenient dashboard

## Par level management

Reduce over-purchasing and renting by tracking equipment use and on-hand inventory

## Fleet level inventory management

View up-to-date information on the amount, location and status of assets

## Recall management

Be aware of timely recall notifications with specialized equipment features

## Preventive maintenance

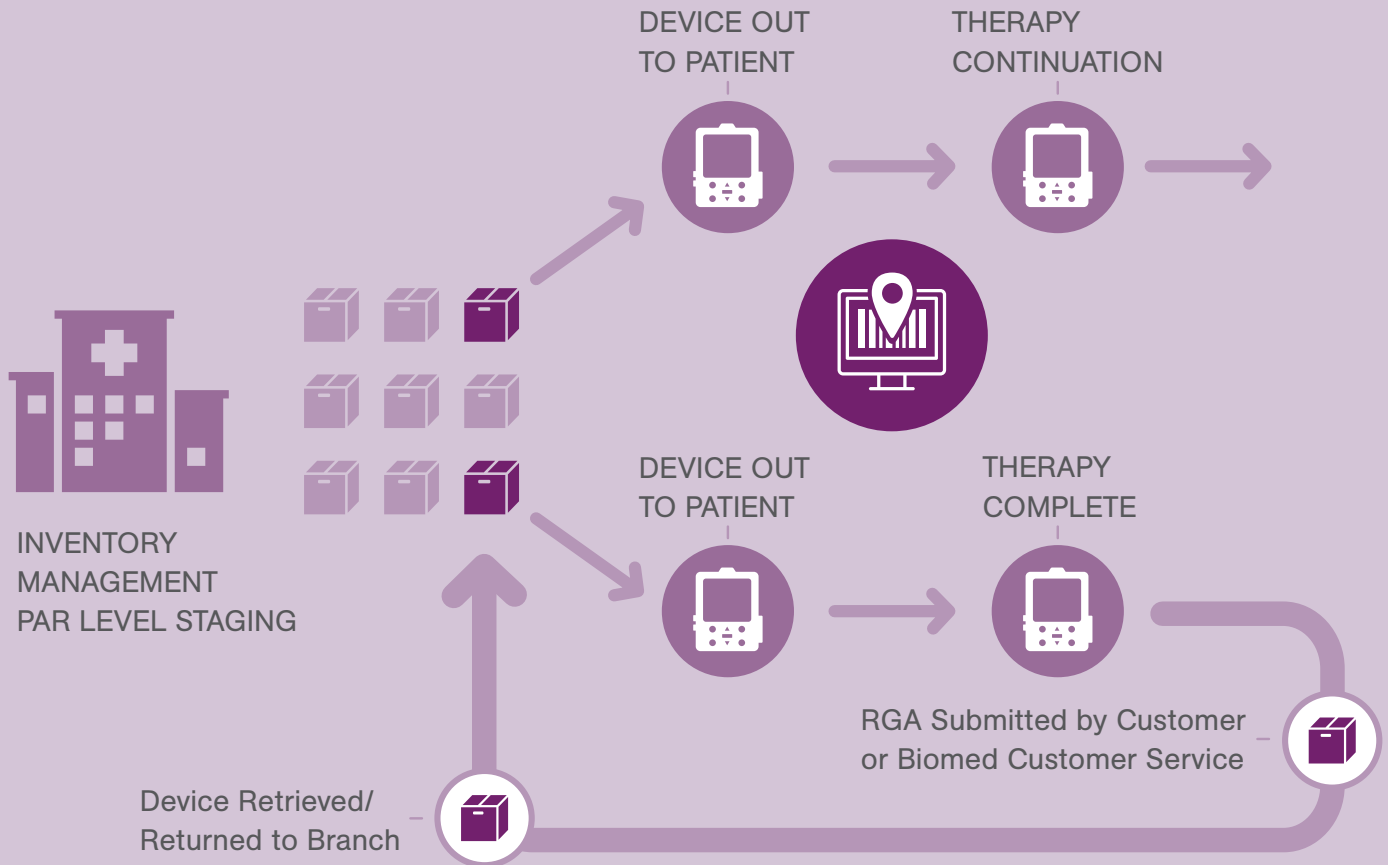

Stay on top of service and preventative maintenance with real-time device location and status

## Return Goods Authorization (RGA)

Request rental return, preventative maintenance, or repair authorization for a device directly in OneTrack

# Start-to-finish intelligence

## Reduce equipment costs, improve utilization, lower operational costs and increase efficiencies with McKesson OneTrack™

### Improve inventory management

Make sure your staff has ready access to the medical devices they need, when they need them.

### Lower operational costs

Free up staff to focus on patient care by automating inventory management. See real-time inventory data, monitor trends and ensure device availability meets patient demand.

### Automate inventory levels

Improve usage of existing equipment, reducing unnecessary rentals and purchasing of extra inventory.

### Enhanced efficiencies

Speeds up process and improves customer experience.
