

Naturepedic **for baby**

organic crib mattresses
+ sleep accessories

naturepedic[®]  baby

When they're not in your arms,
the *safest place* is a Naturepedic.

why organic

Healthy, organic sleep – it helps your little one grow, form memories, explore their world and so much more.

At Naturepedic, we know that healthier sleep starts with a healthier crib mattress. That's why we handcraft our certified organic crib mattresses with sustainably sourced materials like organic cotton, plant-based PLA batting and food-grade waterproofing made from non-GMO sugarcane.

Of course, choosing organic is also about what you're not getting. We make our mattresses without the polyurethane foam, flame retardants, formaldehyde, fiberglass, GMOs, glues/adhesives, vinyl/PVC, phthalates and other harmful materials that are common in conventional crib mattresses, because your baby's safety is your top priority – and ours, too.

Together, let's give your baby their best start – one peaceful night of sleep at a time.

baby collection

cleaner, gentler, organic.
shh ... we'll take the night shift.

organic **crib** mattresses

Why do parents trust Naturepedic? Because we go beyond industry requirements to give you as much peace of mind as you can find during those precious infant days. Our organic crib mattresses provide:

chemical safety

Certified organic so you can relax knowing your baby is not resting on polyurethane foam, chemical flame retardants or questionable materials.

physical safety

Firm, snug fit and reinforced edge support for a safer surface that aligns with recommendations from the CPSC and American Academy of Pediatrics.

allergenic safety

Made without latex or other common allergens ... because you don't know what your baby could be allergic to, and we don't want to find out at bedtime.

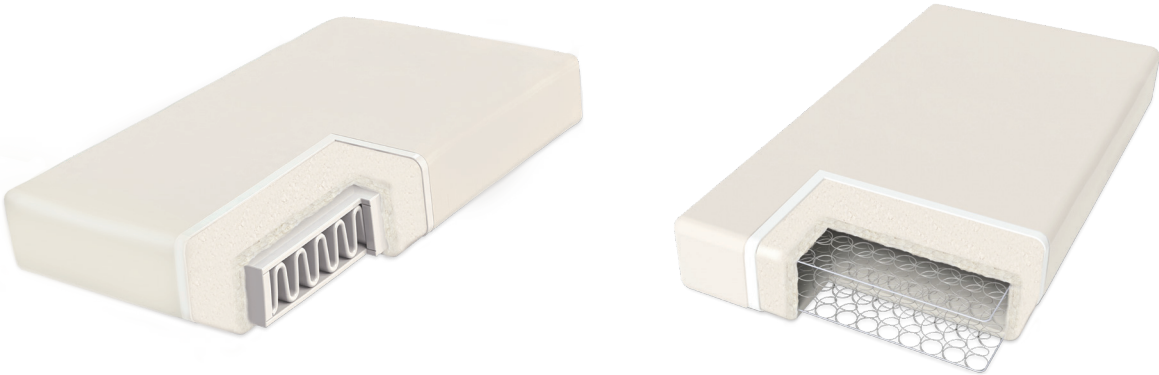

hygienic safety

Seamless, food-grade polyethylene waterproofing made from non-GMO sugarcane stops your baby's messes from seeping into the mattress.

classic organic crib mattresses

Naturepedic’s Classic Organic Crib Mattress avoids harmful chemicals and potential allergens without sacrificing comfort or convenience – all while remaining the lowest-cost certified organic crib mattress on the market.

classic lightweight model

A lightweight, easy-to-lift support core made from food-grade polyethylene offers the firm support infants need and convenience parents appreciate during frequent sheet changes. Choose between standard construction and a 2-stage design, featuring a firm side for infants and a medium-firm side for growing toddlers.

Lightweight: **\$269** \$379, Lightweight 2-Stage: **\$299** \$419

Canadian pricing (CAD) shown in green throughout the catalog.

classic innerspring model

A durable steel innerspring system offers long-lasting support for Baby without the glues and adhesives found in most coil systems, while the flippable, 2-stage mattress design adds convenience and value.

\$329 \$459

Canadian pricing (CAD) shown in green throughout the catalog.

safer sleep for tiny sleepers

Supportive, hygienic and certified organic, the Classic Organic Crib Mattress offers all the essential health and safety features your little one needs – no compromises.

breathable organic crib mattresses

Meet the only crib mattress on the market that's **certified organic, breathable and waterproof.**

organic breathable crib mattress (2-stage)

Our breathable design features a porous, breathable cover that allows for 360° airflow – Baby can breathe right through it. The cover is removable, washable and dryable for enhanced breathability that doesn't sacrifice on hygiene. Flippable mattress design features a firm side for infants and a medium-firm side for growing toddlers.

Lightweight: **\$359** \$559, Innerspring: **\$399** \$629

Canadian pricing (CAD) shown in green throughout the catalog.

breathability done right™

Breathability *shouldn't* come at the expense of essential hygiene features. With Naturepedic, it *doesn't*.

organic breathable ultra crib mattress (2-stage)

Look no further for the finest in organic luxury for Baby. The Breathable Ultra offers the same premium safety features and healthier waterproofing as all of our crib mattresses, but with a cozy, quilted breathable cover made from designer fabric that adds a layer of air between Baby and mattress.

Lightweight: **\$499** \$699, Innerspring: **\$549** \$769

Canadian pricing (CAD) shown in green throughout the catalog.

organic breathable mini crib mattress

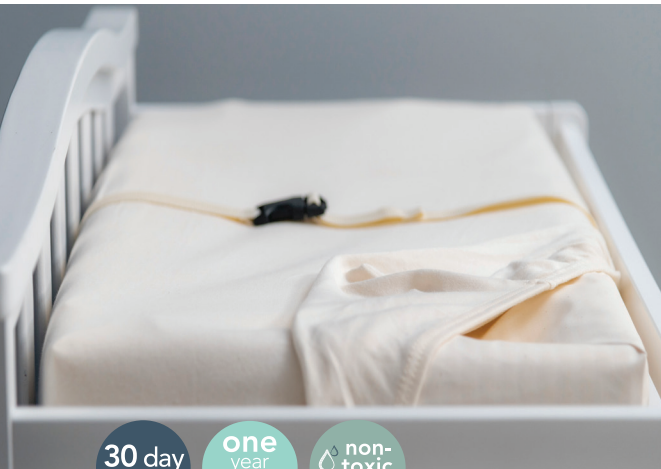

Breathable, hygienic, convenient and compact, this mattress features a strong yet lightweight construction that provides the support your baby needs and convenience you'll appreciate when it's time to change the sheets. Practical breathable design includes a porous cover that allows for 360° airflow and is removable, washable and dryable.

\$279 \$389

Canadian pricing (CAD) shown in green throughout the catalog.

Oval Mini Fitted (27"x47"x3") Ivory: **\$29** \$39

Canadian pricing (CAD) shown in green throughout the catalog.

EXPERIENCE HEALTHIER, **More Sustainable Sleep**

In 2003, we started Naturepedic because we knew a better way to sleep was possible, and we've been developing better-for-you sleep essentials ever since. Safer, healthier, comfier, cleaner ... better.

We practice stringent organic materials sourcing, vigilant testing and purpose-driven business practices, and we proudly release a

Sustainability Report each year. Plus, as a **1% for the Planet partner**, we donate one percent (or more) of our annual mattress sales to nonprofits dedicated to environmental causes.

When you place your baby to sleep on a Naturepedic organic mattress, you're a part of a much bigger solution ... tonight and every night, for generations to come.

What if you could *change the world* while you sleep?

what's inside a Naturepedic?

At Naturepedic, our motto is **Only Good Things**, and that's what you'll find in our baby sleep essentials.

ORGANIC COTTON FABRIC + FILL

We only use breathable, GOTS certified organic cotton for unparalleled comfort and peace of mind. No GOTS-prohibited chemicals, pesticides, dyes or other treatments.

PLA

Made from non-GMO sugarcane, PLA is a GOTS approved, high-performance batting material that adds resiliency and improves moisture wicking for the comfiest night's sleep.

SEAMLESS WATERPROOFING

Our patented wipe-clean waterproofing uses food-grade polyethylene made from non-GMO sugarcane – no vinyl/PVC or phthalates.

STEEL INNERSPRING SYSTEM OR WAVESUPPORT™ CORE

Innerspring crib mattresses feature an exclusive coil system made without glues or adhesives. Our lightweight models feature our patented WaveSupport™ core made from food-grade polyethylene.

TRUST IN Safe Healthy Sleep™ SINCE 2003

NATUREPEDIC DIDN'T JOIN THE ORGANIC MATTRESS REVOLUTION. WE PIONEERED IT.

In 2003, Founder and Board-Certified Environmental Engineer Barry Cik went crib mattress shopping for his first grandchild and couldn't find a single option made without questionable chemicals, harmful waterproofing, potential allergens or hazardous flame retardants.

He knew his family and families everywhere deserved better – and thus, Naturepedic was born. Today Barry and his sons, Jeff and Jason, manufacture certified organic mattresses and sleep accessories for the whole family.

it's not organic unless it's certified organic.

Our certifications and advocacy efforts are incredibly important to us – they're a big part of why you can trust us! We're not just a mattress manufacturer with an organic option. We're dedicated environmentalists on a mission to help protect you and the planet from toxic chemicals. **Because you're both irreplaceable.**
