MY NOTES

Now that you've done your homework, make a list of all the must-have features that you need in your next EHR. We've taken the liberty of starting your list for you.

Pediatric-specific features and functionality built to help me achieve clinical, operational, and financial success

Other Services + Solutions

Can your EHR do this?

In addition to our comprehensive suite of pediatric-specialty EHR features, we can position your practice for growth and success with our patient engagement and practice marketing solutions. They include a **virtual health telehealth platform, 24/7 pediatric answering service, custom website design, pediatric medical content packages, SEO + findability, and online reputation management.**

Here's how we can help!

PATIENT ENGAGEMENT

- A U.S.-based 24/7 pediatric-specialty answering service
- A HIPAA-compliant virtual care platform with advanced video conferencing + speech dictation technologies to connect with patients anywhere they are
- Join a telehealth visit using a link - no login or apps are required
- Telehealth group rooms for up to 30 people, with chat messaging available in all rooms
- Integration with our 24/7 OnCall Answering Service lets clinicians convert after-hours messages into telehealth visits with a single click

Have peace of mind knowing that we've handled **over 1.2 million** pediatric patient calls... and counting.

PRACTICE MARKETING

- Custom, mobile-friendly website design
- A semi-custom mobile app that mirrors your website
- Symptom checker and dosing information website add-ons
- A medical content library that includes 900+ articles from the AAP and Dr. Barton Schmitt
- Pediatric medical content in English or Spanish
- Online reputation management services
- Advanced analytics tools for improved SEO + findability

84% of SEO clients moved to first-page positions for their most relevant + highly sought-after keyword phrases within a year.

Here's the bottom line— we do what generic EHRs can't.

So go ahead and compare us to any EHR you're considering or currently using! Then, give us a call to see OP in action and discover the OP difference.
