Nemours Children's Hospital

6535 Nemours Parkway
Orlando, FL 32827

Lakeland Regional Health Medical Center

1324 Lakeland Hills Boulevard
Suite A
Lakeland, FL 33805

We understand that children and teens aren't just small adults, so they need prompt and innovative surgical care specifically designed for their growing bodies.

- We offer experienced general and thoracic surgeons using specialized programs to care for neonatal, colorectal, chest wall and oncologic conditions.
- We provide advanced surgical treatments with the use of minimally invasive techniques — including state-of-the-art robotic procedures — to minimize pain and expedite a child's return to normal activities.
- We partner with community physicians as well as other pediatric specialists to deliver coordinated, whole-child care from routine diagnoses to complex conditions.

Why choose us?

We are a leader in surgical care for kids, pioneering new procedures, approaches and ways to diagnose.

- To expedite care — and reduce anxiety for your patients and families — in most cases we see referrals for new masses on the same day.
- We welcome referrals based solely on clinical acumen. Imaging studies are not a prerequisite.
- When imaging is required, our large pediatric radiology team uses advanced equipment and kid-friendly methods to capture and read the best possible images.

More Information

To view our team of experts — including board-certified and fellowship-trained physicians — please visit [Nemours.org/surgery](https://www.nemours.org/surgery).
