

# INCLUSION

Wacky World Studios is committed to designing all spaces to be inclusive. We believe themed environments should be aesthetically pleasing and inspire imagination and creativity, but also make everyone feel welcome and included!

We prioritize and plan model inclusive play environments by providing a robust variety of activities and design features that address the physical, social-emotional, sensory, cognitive, and communicative needs of all children, including those with disabilities.

These inclusive essentials align with evidence-based design best practices to break down both physical barriers for access and social barriers to participate.
