

About Third Eye Health

As the nation's leading telehealth post-acute provider, our experienced physicians are accessible afterhours, on nights, weekends and holidays, through our secure, EHR-integrated, mobile telehealth solution. Post-acute care administrators and providers receive additional support through care coordination services to ensure seamless transitions between Third Eye Health physicians and the primary physicians. With Third Eye Health, patients receive high quality care at the bedside resulting in improved clinical outcomes, preventing unnecessary transfers to the emergency department (ED) and reducing hospital readmissions.

Access to Clinical Care

- After-hours nursing tool to access to Third Eye Health physicians
- One-touch, easy-to-use mobile technology
- Access to Third Eye Health physicians during nights, weekends and holidays

Enhanced Quality

- Reduction in return to hospital & readmission rates
- Alignment with skilled nursing facility and provider groups to support residents following protocols and processes set in place by the primary care team
- Increase referrals by increasing quality metrics & outcomes

Financial Outcomes

- Opportunity for additional revenue by capturing telehealth site origination fees
- Reduce bed hold days for patients who can be treated in-place

Our Care Process

When a nurse needs to consult a physician, a simple tap of a button through our SecureChat app connects the nurse with a Third Eye Health physician. Within minutes the nurse is able to text, share photos and video chat with our physician. Our physicians have secure access to patient medical records where they will enter notes and wet signature orders for patient care.
