

The Complete Pre-visit Questionnaire Solution

Plus Clinical Process Support

The most complete web-based patient data collection system for comprehensive health and mental health care for all ages. It automatically assigns, requests, collects, scores, interprets, and graphs.

CHADIS helps write your clinical notes, facilitates between-visit monitoring, referrals and tracking, MOC-4 credits, and population data collection.

Access Hundreds of Pediatric and Adult Questionnaires

Autism Diagnostic; Autism Screening;
Developmental Screens; Feeding; Language;
Motor; and Social Communication

■ Family/Environment/Social Determinants

■ Quality Monitoring

(Custom questionnaires are possible at additional cost)

How CHADIS works

Set-up

- You select from >600 questionnaires/tools to set up automatic assignments for age and type of visit, including monitoring.

Pre-visit

- Your patients register/login and take questionnaires by smartphone, tablet, or computer.
- Teachers and Caregivers can be “invited” by secure email including online parent consent to submit feedback

Visit

- You get results and optional decision support at time of visit.
- Data can flow into many EHRs but also easily copy/pastes

Post-visit

- Individualized education and resources for patients appear in Care Portal or print
- Monitor your patient's outcomes
- Care coordination
- Web case conferences
- MOC-4 credits
- Quality improvement reports

Benefits to Patients

- Patients fill out questionnaires at home at their convenience or in your office before their visit.
- Patients list their concerns and goals before the visit improving patient-centered care.

Benefits to Clinicians

- Reduces your documentation burden
- Automation saves you time
- MOC-4 requirements without chart audit

Benefits to Care Systems and Practices

- Improved workflow efficiencies through online screening and scoring, eliminating paper
- Helps meet regulatory/certification standards (e.g., Medicaid; ACA; PCMH)
- Increased income through billable CPT codes.
- Facilitates required reports such as Quality Improvement data for systems.

“CHADIS finally makes Bright Futures possible.”

Joseph Hagan, MD, Editor, Bright Futures

“CHADIS is the best example of what the future of pediatrics should look like.”

Neal Halfon, MD, UCLA from his address “The Future of Pediatrics”, PAS meeting

“CHADIS has been a great time saver and has improved the quality of care that I deliver in the office.”

Dr. Robert Stephens,
Cornerstone Pediatrics,
Sequin, TX

Complete questionnaires online using computer, tablet or smartphone.

Special Features

- CHADIS is a portfolio sponsor of the ABMS providing MOC-4 credits and QI data.
- CHADIS sends reminders via email or SMS to complete questionnaires.
- Educational and community resources automatically assigned to Portal or to print based on questionnaire results.
- Provides personalized treatment plans.

Integrated Behavioral Health

- Full range of behavioral health and general medical tools for patients and educators.
- Care coordination feature:
 1. Referral facilitation
 2. Communication and sharing of CHADIS reports
 3. Status updates
 4. Graphical co-monitoring of outcomes
