

Quality Autism Services for Your Patients

Elemy Shares The Care

After an autism diagnosis, many patients experience delays in accessing behavioral intervention services: long waitlists, administrative burdens, and lack of care coordination.

Elemy is working tirelessly to change that.

Our team of licensed clinicians and care coordinators will work with you and your patients to access the highest quality therapy based on the principles of Applied Behavior Analysis (ABA).

Quality Care

Elemy uses research-quality metrics and analytics to continuously assess our quality of care, clinical progress, and outcomes. We have achieved an industry-leading 85.2% reduction in problem behavior for clients in the first 6+ months of therapy. Our families are 3 times more likely to recommend Elemy than the industry average.

No year-long waitlist

Starting as soon as possible after autism diagnosis with intensive behavioral intervention can have powerfully positive effects on a child's behavior and relationships with family and friends, their performance at school, and their interactions with others. Long waitlists are an obvious block to that success. Fortunately, Elemy matches your patients with care up to 4x faster than other providers.

Powered by Technology

We combine cutting-edge tech with comprehensive, child-centered care. Our hybrid model provides remote access to a Board-Certified Behavior Analyst who works with and supervises an in-home therapist — and all are supported by a care coordinator. And our Parent 360 platform tracks care and keeps your office informed on progress.

How We Work for Your Patients

1

Refer A Patient To Elemetry

Our family concierge team will be in touch with your patient within 48 hours.

2

Facilitate, Organize, & Prioritize

We will schedule an assessment, manage expectations, educate parents, and serve as a liaison to both the family and your practice. Once a diagnosis is confirmed, we coordinate with insurance providers, share valuable content, and manage services.

3

Create A Care Plan

Our Board-Certified Behavioral Therapists will create an evidence-based, data-driven approach to care, personalized to each child.

4

Begin Therapy

The child and family start in-home therapy with a Registered Behavioral Technician and will have holistic support from Elemetry at every step.

Meet our clinical leaders

Steven Merahn MD, FAAP

Chief Medical Officer

Trained as a pediatrician, Dr. Merahn is an experienced physician-executive who has served as Chief Medical Officer for national practice networks and as a public health Medical Director, with special focus on behavioral health integration and special needs communities. He is currently a member of the Primary Care Committee of the AAP Section on Developmental and Behavioral Pediatrics, and is the only pediatrician on the Council of Autism Services Providers ABA Accreditation Standards Committee.

Henry Roane PhD, BCBA

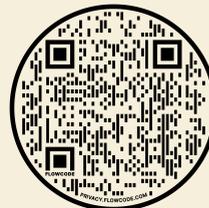

VP of Clinical

Dr. Roane is also a Professor in the Department of Pediatrics at the State University of New York (SUNY) Upstate Medical University and Executive Director of the Golisano Center for Special Needs. Dr. Roane is the author of over 200 peer-reviewed articles, chapters, and the widely used Handbook of Applied Behavior Analysis.

Our experienced team of Clinical Leads oversee 80+ BCBA's and 350+ RBT's.
