

CHADIS Complements Telehealth

Telehealth Support

Pre-visit patient data helps with documentation while focusing on your video patient

Graphics for shared decision making that can be viewed during televisits,

Patient-specific education in secure individualized portal pages

Ability to schedule dates for questionnaires for follow up and care management

CHADIS Care Coordination functionality facilitates referrals and data sharing and automatically tracks them.

CHADIS can serve as a secure, simple and inexpensive electronic record accepting clinician notes and formatting for easy printing or pdf creation of referral notes.

Patient Education & Electronic Handouts

"Developmental prescriptions" created based on the child's milestones

Tailored safety guidance

Anxiety-related resources

CHADIS Care Portal can provide personalized treatment plans (e.g. Asthma Action Plan; ADHD goal-related messages) that can be updated remotely by the clinician.

Over 600 Child & Adult Questionnaires & Tools

Social Determinants of Health

Private portal for teens

General Health Questionnaires

Developmental and Autism Questionnaires
