

## OP Patient Portal™

powered by IntelliChart

### Easily connect with patients and parents.

The OP Patient Portal is a secure, HIPAA-compliant solution that facilitates patient and parent engagement with your practice. Powered by IntelliChart, the industry leader in patient engagement technology, the OP Patient Portal enables your practice to:

#### Improve Communications and Documentation

- Send secure messages, handouts, excuse notes, and asthma plans between parents, patients, and practice staff
- Allow patients to upload pictures/forms that can be seen by practice team
- Fill out school, camp, sport and physical forms with a single click and send completed forms through portal

#### Increase Patient and Parent Satisfaction

- Allow patients to view and print patient's full health record from a smartphone or computer, including demographics, lab results, upcoming appointments, list of medications and immunizations received
- Allow parents to add a child/dependent to their account and access all children's accounts with one log-in
- Grant each parent their own access to child's account
- Protect sensitive patient data from being displayed by setting a visibility level and restricting granular clinical information to balance patient safety/privacy

#### Save Your Practice Time and Money

- Send registration emails automatically to new and existing patients
- Give patients the option to self-schedule appointments and complete surveys prior to office visit
- Allow patients to request refills and referrals online as well as pay a balance and view billing statements, decreasing practice phone calls

**When it comes to running a pediatric practice, FIT MATTERS.**
