## Neonatal Simulation A Practical Guide

*Editors: Lamia Soghier, MD, MEd, CHSE, FAAP, and Beverley Robin, MD, MHPE, CHSE, FAAP*

Developed by the leading experts in neonatal simulation, this innovative new resource delivers neonatology health care professionals and educators essential guidance on designing, developing, and implementing simulation-based neonatal education programs.

The early chapters cover learning theory, fundamentals of scenario design, and simulation and the Neonatal Resuscitation Program®. The later chapters cover specific applications of simulation in neonatology and debriefing techniques.

The book walks the reader through scenario design, mannequins and task trainers, moulage, simulation techniques, virtual simulations, mannequin adaptations needed to conduct specific simulation procedures, debriefing methods, and more.

Step-by-step images walk the reader through how to adapt mannequins to simulate procedures and how to replicate body fluids and conditions commonly encountered in newborns.

With 225+ color images, as well as plenty of helpful boxes and tables throughout, the book will be useful to both novice and expert.
