

# SICK KID?

We have an app for that! It's free!

Kid Care guidelines help you make decisions on what level of medical care (if any) is needed and how to treat your child at home when it's safe to do so. You can select from more than 100 pediatric topics and search from an alphabetical list or by body area.

The app is free for iPhone and Android and may be downloaded from [iTunes](#), [Google Play](#) or from our web site, [StLouisChildrens.org/app](#).

Also, visit us on [Facebook](#), [YouTube](#) and [Twitter](#).
