

Essential Anesthesia Support

The C-Sponge is designed to replace the traditional gauze throat pack, and eliminate the inherent problems of gauze. A saturated C-Sponge will stay in place when surgical suction is applied; this will drain the C-Sponge without requiring its removal. C-Sponge may be adjusted anteriorly or posteriorly depending upon the procedure being performed. Available in various sizes to best accommodate individual patient and doctor preferences.

Highly Absorbant • Creates Pharyngeal Barrier • Resistant to Bur Catches • Single C-Sponge Sufficient for entire procedure • May be squeezed or suctioned to drain

C-Sponge	Code#	Profile/Description	Quantity	Price*
	CSR 100	C-Sponge Regular	100	\$25.95
	CSP 50	C-Sponge Pediatric	50	\$15.95
