

“As law enforcement officers, we have an obligation to the victims of crime to lawfully use every resource within our means to properly identify suspects and to implement the policies and procedures necessary to ensure that we use those resources in a responsible manner.”

— ARMANDO AGUILAR,
Assistant Chief, Miami PD on
why agencies need Clearview AI
in their investigative toolkit

ESTABLISHING RESPONSIBLE USE

We realize the value of facial recognition technology as an effective lead generation tool for public safety and do our best to ensure responsible use. We also understand law enforcement agencies need built-in compliance features for increased oversight, accountability, and transparency within their jurisdictions, such as advanced account administrator tools, as well as user-friendly dashboards, reporting, and metrics tools.

IMAGE ENROLLMENT INTAKE FORM

A case number and crime type is required before each search and allows for comprehensive auditing, time-savings, and simple report generation.

ADMINISTRATIVE OVERSIGHT

Every agency is required to designate an assigned administrator that can see an in-depth overview of their organization's search history to help deter and detect improper searches.

USAGE REPORTING & AUDITING

Automated generation of statistical reports is available and meant to show agency specifics on how the tool is being used, as well as the ability to export a PDF report of the cases being worked on, including the option to download a report of the images and links associated with current searches.

CUSTOMIZABLE TO YOUR AGENCY'S POLICY

Clearview AI acknowledges individual policies and state requirements vary from jurisdiction to jurisdiction. As a result, many of the compliance and auditing features made available to our clients are customizable to facilitate an agency's ability to meet system oversight, accountability and CJIS compliance standards.

ZERO WRONGFUL ARRESTS

To date¹ and with due diligence, Clearview AI is not aware of a single instance where the technology was used by a client and it resulted in a wrongful arrest.²

¹ As of 2/15/2022

² Clearview AI's application is intended to be used only in full accordance with the Clearview AI terms of service and user code of conduct.
