

Unique lab processes

We provide custom automation solutions.

Director is robust, proven software that's customizable to enhance any lab's unique workflows.

Intuitive

- Design customized user interfaces to minimize setup and reduce errors
- Easily create complex, multi-branched methods
- Mobile-friendly design

Flexible

- Create, edit and simulate new methods while the system is operating
- Run multiple assays simultaneously on one system
- Utilize custom scripts within a method
- Operate unused equipment in offline mode during protocol execution
- Device pooling
- Advanced I/O control

Powerful

- Multiple Robot control
- Real time run charting
- Advanced data logging captures plate movements and time at every location
- Remote and delayed start with logical sequencing
- 21CFR Part 11 Compliant
