

A group of experienced scientists with recognized know-how

- Advanced knowledge in automation, compound/sample management and project management
- Prior experience working in large pharma, biotech & academic settings

A purpose-designed facility

Compound flow, temperature and humidity controlled, fire detection and extinguishing system, access control

Long term partnerships

Top 10 pharma, mid-size pharma, start-up, non-profit, government & academia

Capacity

- Neat storage
 - Current capacity of ~4.5M
 - Manual & semi-automated
- Automated Liquid storage
 - Current capacity of ~ 3.2M
 - Azenta & TTP automated solutions
- Ambient & refrigerated storage of short- and long-term storage sets, including disaster recovery
- DEA licensed storage of materials
 - (Schedule II-V)
- Process controlled and qualified shipment according to dangerous goods regulation

Qualified business processes to support programs all along the R&D value chain. Develop partnership and provide services in compound and sample management

Target validation	Screening to Hit	Hit to lead	Lead to Candidate	Development
Collection plates (validation library)	Collection plates / Assay Ready Plates	Custom plates for confirmation & QC (Cherry picking)	Individual solutions / custom plates	Powder deliveries (candidate compound)
	Combination plates	Dose response plates	Dose response plates	
		Individual solutions	Powder deliveries	
		Powder deliveries		

Archive storage (powder / solid, individual solutions, collection plates & disaster recovery collections)

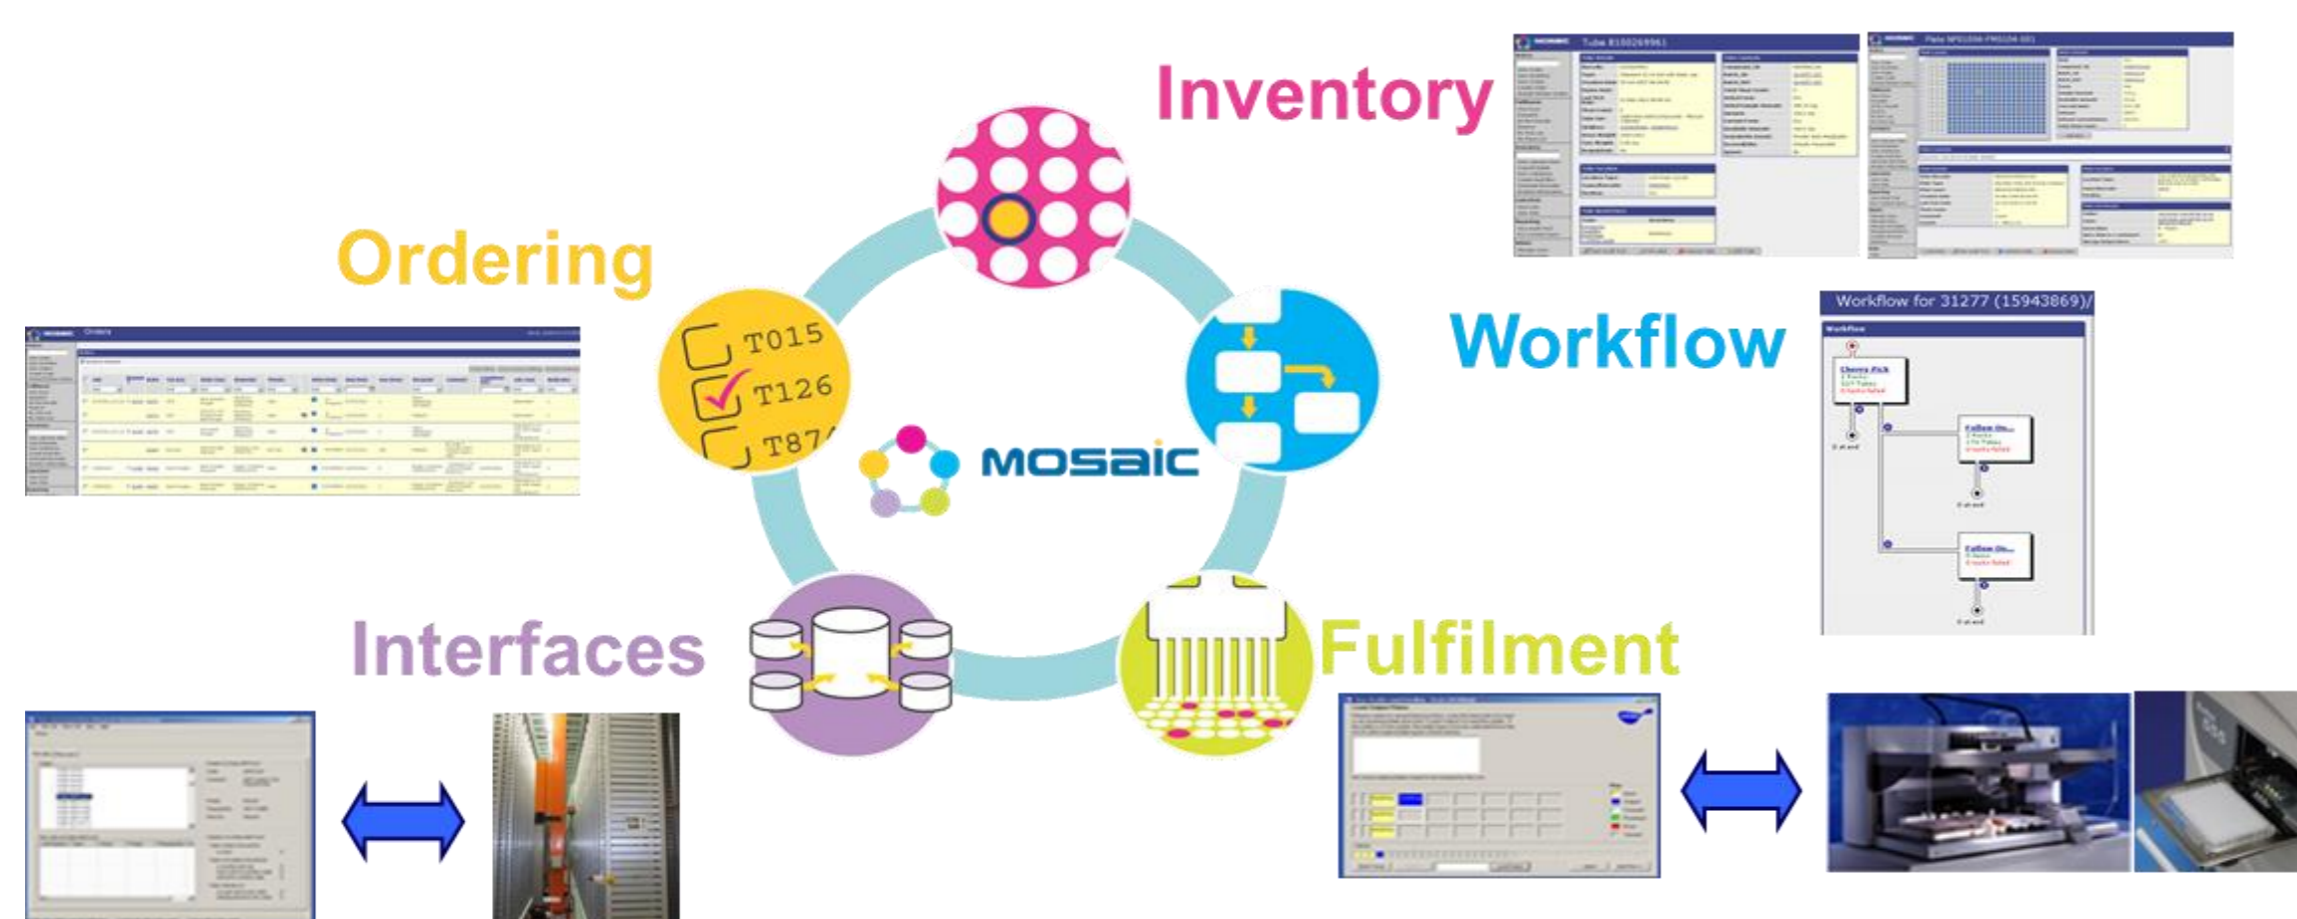

Collection growth & distribution

Experts in Sample Acquisition and Reception

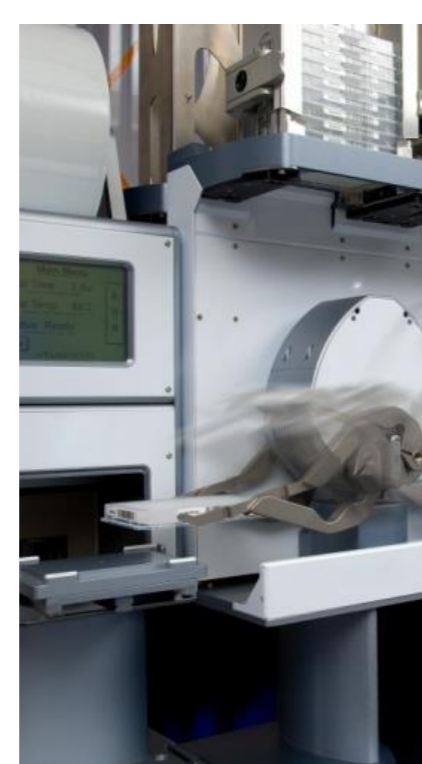

- Millions of samples processed from >150 global suppliers

Industry-standard informatics to manage, record and track activities

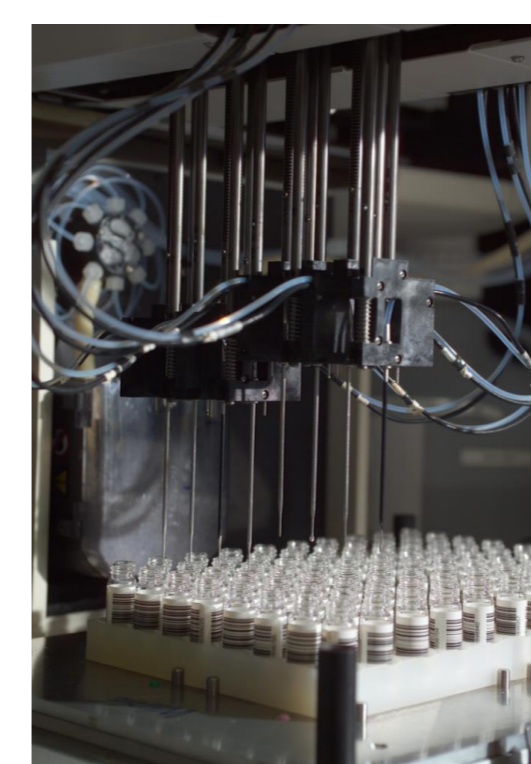

Flexible floor design

Automated plate handling

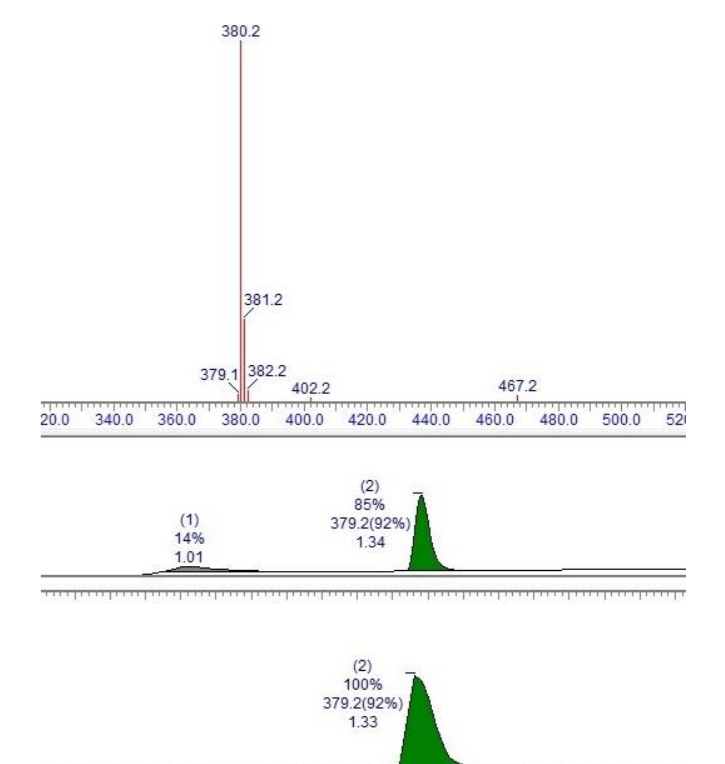

Automated 2D barcoded tube storage

Automated liquid handling

High density ambient storage

LC-MS analytical services

Knowledgeable distribution processes

- Millions of samples delivered to 1,800+ recipients at >750 locations in 28 countries

External collaboration support

- Project management for collaborations
- On-demand interaction with worldwide collaborators, including other Evotec Sample Management sites
