

discngine

Enhancing Life Science Research

Consulting

With a strong expertise in life sciences R&D processes, we provide high quality IT services to help design and build scientific web apps.

Molecular modeling

Cheminformatics

Sample Management

Assay Data Capture & Analysis

Registration & Tracking

Decision Making

Knowledge Management

R&D Processes

Web applications

Cloud-based infrastructures

Database design

Why Discngine?

Dual-skilled experts

Problem-solving mindset

Industry-standard technologies

Agile methodologies

Software editor expertise

Remote services

"I'm using [Discngine] as a definition of good for what developers should do in terms of developing the right solution, by refining and questioning."

James Peace, Syngenta, Business Analyst

discngine

Bespoke development

After 15 years in business, we have a proven track record of building applications that address unmet needs in R&D IT.

Integration

Research application landscape tends to be scattered. Yet R&D processes benefit from tight integrations. Our strategy has always been to use first-in-class tools and integrate them into bigger systems.

Revamping

Ever needed to reshape an existing application and upgrade it to a modern technology? Thanks to the combination of our agile approach, process knowledge and the technology choices, we will do it efficiently.

Scientific consulting

Our expert teams in computational chemistry, molecular modeling or Bioinformatics will help you to tackle tricky scientific issues.

Audit, Training, Support
