

Enhance your practice Enhance your patients

Custom solutions for biomechanical analysis.

NORAXON
MOVEMENT • DATA • PEOPLE

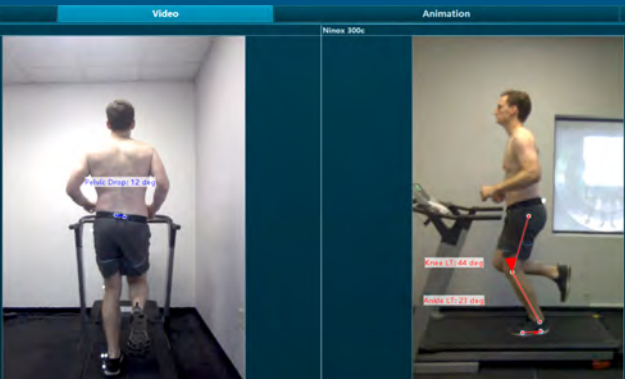

Enhanced Evaluation Solutions

Muscle Biofeedback Training

Expedite Client Outcomes

- Neuromuscular Re-Education
- Coordination Training

Gait & Balance Assessment

Objective Evaluation of Movement Mechanics

- Walk/Run Analysis
- Balance and Weight Distribution
- COP Sway Analysis

Return to Play & Injury Risk Evaluation

Data Driven Decision Making

- Jump Analysis
- EMG-Isokinetic Testing
- Functional Movement Assessment

Measure important movement metrics

Visually **communicate** findings

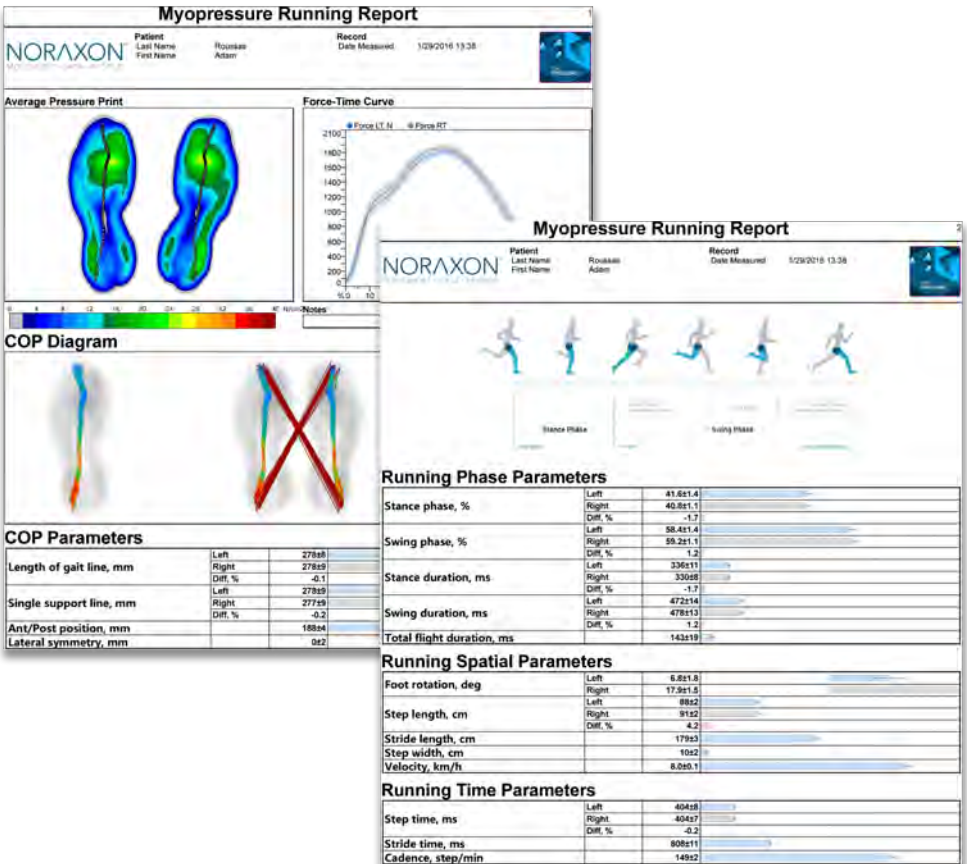

Track progress

Create custom take-home **reports**

Example Gait Report

Noraxon's medical-grade equipment and software allows for **synchronized data collection** of important human movement metrics.

Flexibility of the platform allows you to customize the neuromuscular, kinematic, and kinetic data you need to help guide your clinical decision making process.

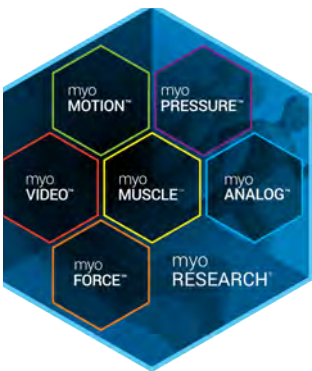

HARDWARE

- Surface EMG
- Portable Motion Capture
- Video Capture
- Pressure
- 3D Force
- Portable Lab

APPLICATION REPORTS

- Walking/Running Gait
- Posture/Balance
- EMG-Isokinetics
- Pelvic Floor Dysfunction
- Jump Analysis
- Low Back Pain
- Point-of-Interest
