MyBRAIN

THE POWER OF
MOBILE DATA COLLECTION
TO FUEL YOUR PERSON-CENTRIC
CARE PLANS.

Benefits For Your Patients

- Enjoyable alternative to standard assessments
- Increases engagement and promotes self-management
- Surveys can be taken when and where patient feels most comfortable; increasing data integrity.
- Automatic interventions delivered based on survey answers
- Data is based on daily, self-reported data verses reliance on the memory of the patient.

What is MyBRAIN?

Based on Ecological Momentary Assessment, MyBRAIN is a new way to monitor patients throughout their continuum of care.

Clinicians can utilize MyBRAIN's data to:

- Inform resource facilitation and care management.
- Analyze cohorts of interest, particularly in those at high risk groups.
- Perform serial measurement of multiple TBI variables for the patient with a brain injury.

Benefits For Staff

- Data and analysis to support clinical observation
- Provides data for risk stratification
- Tracks progress, setbacks and outcomes in real-time to optimize person-centric care plans
- Ecologically Momentary Assessment - responses from person served can trigger clinical intervention
- Powerful reporting
