

Residency Program

Department of Physical Medicine and Rehabilitation (PM&R)
Rochester, Minnesota

PMR RESIDENCY PROGRAM

Physicians who specialize in physical medicine and rehabilitation (PM&R) know that the ability to function is the key to quality of life. These specialists, called physiatrists, are experts in the diagnosis, treatment, and prevention of disabilities of all types and offer a holistic approach to patient care.

Working with an interdisciplinary team of experts in many fields - nursing, physical therapy, occupational therapy, speech and language pathology, psychology, social work, and others - physiatrists strive to maximize each patient's function, quality of life and independence.

THE MAYO CLINIC ACGME-ACCREDITED PM&R RESIDENCY PROGRAM will prepare you for a career in private practice, research, or academic medicine. The program features:

- A diverse curriculum covering injection techniques, clinical practice pearls, and diagnostic/management of disorders seen in a physical medicine and rehabilitation practice.
- A learning environment that fosters the development of your clinical skills and academic abilities in all areas of rehabilitation medicine.
- A balance between outpatient and inpatient rehabilitation experience, including subspecialty rehabilitation programs, electromyography, neurology, and research.
- Extensive EMG and musculoskeletal medicine training, including ultrasound.

- A large, diverse patient population and close working relationships with a large staff of physiatrists.
- The opportunity to form collegial relationships with experts in many related medical and surgical specialties.

VISITING MEDICAL STUDENT CLERKSHIP

[Visiting Medical Student Clerkship](#) opportunities available
[Scholarship](#) opportunities also available
