THE EMPLOYMENT SUITE

Tools For Career Exploration, On-the-Job Supports & Employee Retention

Employment Pathfinder

Employment Pathfinder is a **career exploration and discovery** app helps you gain insight into important factors necessary to find the jobs best-suited for the people you serve by surveying:

- Job Readiness
- Job Interests
- Job Skills

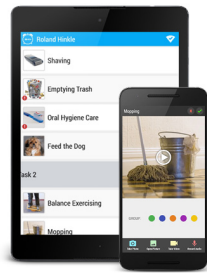

Assessments can be taken remotely and results can be wirelessly transmitted to CreateAbility's BEAM cloud for real-time retrieval.

The final, actionable report in Employment Pathfinder provides critical information that serves as a solid foundation for all job coaching strategies.

MeMinder

MeMinder is an app that is used to help people with intellectual disabilities get the **task prompting** and **instruction** they need to feel confident at work.

All tasks can be customized to the level of instruction needed by the individual on any given day in:

Audio-only

Talking Pictures

Video Modeling

MeMinder allows job coaches and developers the ability to create custom tasks or choose from over 200+ pre-created tasks in the public library.

Job coaches and developers can monitor progress and setbacks of one or many employees in real-time - on a single dashboard.

EVALU8NOW

EVALU8NOW is a powerful combination of **web-based, avatar-led assessments** and **interventions** that grant job coaches and developers visibility into their employees' mental health and job satisfaction between face-to-face visits.

Armed with real-time information, job coaches and developers can ward off crises before an employee quits; increasing job sustainability and employees' work experience.

A few of the assessments relevant to employment include:

- | | |
|--------------------------------|-------------------|
| Job satisfaction | Life satisfaction |
| Anxiety | Depression |
| Mood (PHQ9 & GAD-7) | Sleep |
| Dyscontrol (Managing Emotions) | |
| And more! | |
