

*Plant Direct* is an international open access journal of the ASPB and the SEB. The journal publishes original research articles and editorials and takes innovative approaches to encourage a rapid and transparent publication process and deliver excellent service to the plant science research community. Topics include but are not limited to genetics, biochemistry, development, cell biology, biotic stress, abiotic stress, genomics, phenomics, bioinformatics, physiology, molecular biology, and evolution.

All articles published by *Plant Direct* are fully open access: immediately freely available to read, download and share. To cover the cost of publishing, *Plant Direct* charges a publication fee.

#### Reasons to publish with *Plant Direct*:

- Prompt and equal consideration to papers
- Reporting work dealing with a variety of subjects
- Rigorous and fair peer review
- Publishing quality research with speed and efficiency
- Rapid and transparent publication process
- Immediate Open Access

#### Applications are invited for the post of Editor-in-Chief

ASPB, SEB and Wiley are pleased to announce that we are inviting applications for the post of Editor-in-Chief of *Plant Direct*. This is a very exciting opportunity, and applications are invited from individuals working in any area of plant science.

The position is for an initial period of three years commencing on 1st January 2022 (although the handover from the current Editor-in-Chief will begin in October 2021). The initial term may be extended by mutual agreement. The Editor-in-Chief will be appointed by and report to representatives from ASPB, SEB and Wiley, and the role carries an annual honorarium.

All candidates should submit their CV together with a covering letter outlining their suitability for the role and a vision statement for Plant Direct. For more information or for further discussion of the role, please do not hesitate to contact Rosie Trice (Wiley) at [rtrice@wiley.com](mailto:rtrice@wiley.com).

## **Publish your Registered Report in *Plant Direct***

*Plant Direct* now offers Registered Reports.

Registered Reports are a type of article where a study proposal is peer-reviewed before the research is undertaken. Registered Reports bring many positive outcomes. By providing external validation of the study methods, they ensure that the research plans are appropriate, helping to avoid inconclusive studies. Further, they avoid the common bias in publishing to publish only “positive” results—the findings of the research proposed in a Registered Report will normally be published even when they don’t support the author’s model or hypothesis.

Registered Reports enable you to increase the transparency of your published research by pre-registering your work and have your proposed methods and analyses reviewed, prior to conducting the actual research. This means that a significant part of your manuscript will be peer-reviewed before the data collection is complete – with submissions accepted in advance.

## ***Plant Direct* offers preprint and supporting society discounts on author fees**

*Plant Direct*'s publication charge for authors submitting directly to the journal is \$2,200. The following discounts are available on publication fees; the single highest discount applies.

| <b>Discount Reference</b>                           | <b>Discount Amount</b> | <b>Description</b>  |
|---|------------------------|---|
| Manuscript referral transfer discount               | 20%                    | Authors who are referred via the Manuscript Transfer Program receive a 20% discount on the publication charge.  |
| Supporting society members discount                 | 20%                    | Authors submitting directly to the journal who are members of the American Society of Plant Biologists (ASPB) or the Society for Experimental Biology (SEB) receive a 20% discount on the publication charge.   |
| Preprint discount                                   | 10%                    | Authors submitting directly to the journal who upload a preprint of their paper to BioRxiv receive a 10% discount on the publication charge.  |
| Preprint discount for manuscript referral transfers | 25%                    | Authors who are referred via the Manuscript Transfer Program and who upload a preprint of their paper to BioRxiv receive a 25% discount on the publication charge.  |
| Preprint discount for society members               | 25%                    | Authors submitting directly to the journal who are members of the American Society of Plant Biologists (ASPB) or the Society for Experimental Biology (SEB) and who upload a preprint of their paper to BioRxiv receive a 25% discount on the publication charge. |
