The Telehealth Solution Serving  
Individuals With Intellectual and  
Developmental Disabilities

## Why StationMD?

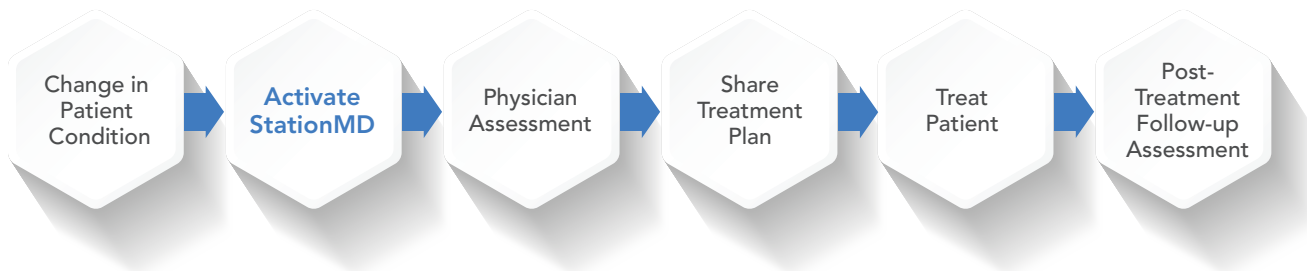

StationMD delivers superior medical care to people with intellectual and developmental disabilities (I/DD) in their home settings employing telehealth. Our physicians have a special commitment to caring for people with I/DD and have dedicated training in this area. Using our telehealth solution, people with I/DD have access to our specially-trained ER doctors from the comfort of their home.

At StationMD, we have successfully reduced the costs associated with unnecessary ER transfers and hospital stays. These savings impact payers, residential facilities, providers, and family members.

## Providing High-Quality Care in a Stable Environment

The trauma of transfer and exposure to infection aside, the ER can be particularly frightening and disorienting for individuals with I/DD. The daily routine of meals, activities, sleeping, and medications is disrupted as well.

## How It Works

## During the COVID-19 Pandemic

At StationMD, we are dedicated to helping you minimize risk during this critical time. During the coronavirus crisis, we are keeping abreast on the latest CDC guidelines in order to keep your staff and your individuals safe.

In addition to the typical medical issues, contact us for help determining who needs to be tested, who needs hospital care, and who needs isolation / quarantine.
