

# Vaccine Management, Made Easy.

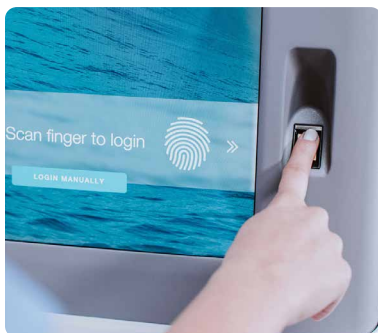

Automate your vaccine storage and handling with a purpose-built solution to safeguard vaccines, enhance patient safety, and meet regulatory compliance.

**AccuVax by TruMed** simplifies all aspects of vaccine storage and handling. The all-in-one system protects both refrigerated and frozen vaccines, eliminates common immunization errors, and automatically rotates vaccine stock by expiry date to minimize waste and loss. AccuVax

eliminates the need for manual counting with real-time inventory and simplifies regulatory compliance with automatic logging and reporting, freeing up time for your staff to focus on patient care.

## SIMPLIFY & STANDARDIZE WORKFLOWS

**Biometric Secure Access**

**Streamlined Workflows**

**Barcode Scanning**

**Informative Graphical Interface**

## DESIGNED TO ENHANCE PATIENT SAFETY

- Safeguard vaccine viability with guaranteed temperature control.
- Graphical user interface and available EHR integration ensures right dose, right patient.
- Ensure first to expire use and prevent administering expired items.
- Improve safety and eliminate up to 91% of common vaccination errors.

*Proper storage and handling of vaccines plays a pivotal role in protecting our patients, and we are dedicated to elevating our standard of care by being on the forefront of innovation with the AccuVax system.*

Bethany Children's Health Center

## PROTECT VACCINE INTEGRITY

- Built-in battery backup guarantees 12 hours of temperature stability.
- Automatic power outage and temperature alerts via text or email.
- Purpose-built, integrated fridge and freezer that guarantees temperature control.
- Door-less design ensures temperature stability, even during heavy use.

## OPTIMIZE INVENTORY CONTROL

- Secure inventory with biometric access control and full user audit reports.
- Real-time alerting suite notifies on low or expiring inventory to avoid stockouts.
- Avoid costly missed billings with automatic documentation of every transaction.
- Inventory usage and reordering suggestions provide optimal quantities when placing orders.

Cloud-based, Enterprise level inventory management & analytics with AccuSite™

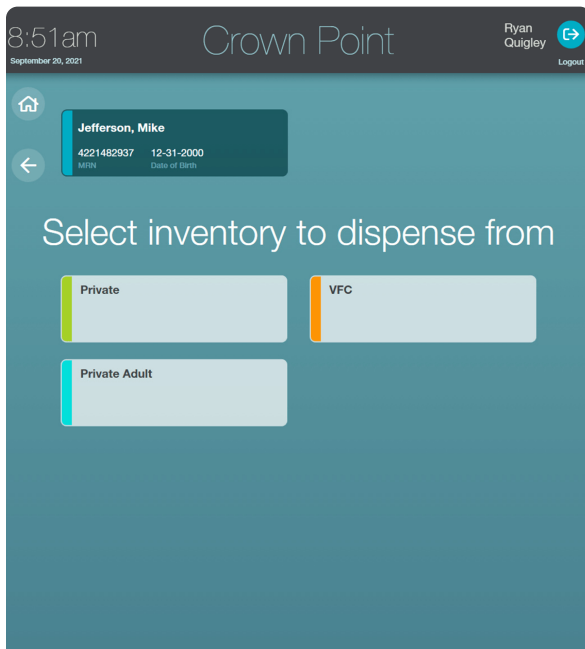

Proactive alerts via text or email include power outage, temperature, and low & expiring stock.

Secure authentication with integrated biometric fingerprint reader.

24/7 customer support, warranty, and scheduled maintenance included.

## AUTOMATE CDC AND VFC COMPLIANCE REQUIREMENTS

- Automates 7 of 10 VFC requirements.
- Easily customize and separate inventory programs: VFC, Private, 340B, Private, etc.
- Records temperatures automatically and generates compliant regulatory logs.
- Maintains real-time, accurate dose counts and usage with inventory stock reports.
- Approved in all 50 states.
