

Enfamil NeuroPro™ Gentlease®

All-in-one comfort for fussiness, crying, gas, and spit-up within 24 hours—backed by clinical evidence and moms 1,2

*Designed with reduced lactose and partially hydrolyzed proteins.

†Among those who have a preference.

See inside 🔷

Our trusted Gentlease® formulation demonstrates rapid and sustained digestive comfort

Randomized, double-blind clinical study demonstrated rapid reductions in feeding issues in 24 hours, sustained through 4 weeks^{1*†}

Maintained soft stools throughout the study (4 weeks)¹

^{*}Study conducted prior to the addition of milk fat globule membrane (MFGM) and 2'-FL HMO in the Gentlease® formula.

[†]Among infants identified as very or extremely fussy by parent report receiving a full-lactose cow's milk protein formula for 7 days prior to enrollment, as compared with baseline.

Results that translate into real-world benefits²

After switching babies to Gentlease®, 8 out of 10 mothers reported reduced fussiness, crying, and gassiness in just 24 hours²

Digestive comfort*

Designed for digestive comfort

with a unique blend of carbohydrates with 20% lactose and partially hydrolyzed proteins

Also provides key ingredients to support brain and immune health

^{*}Designed with reduced lactose and partially hydrolyzed proteins.

A combination of nutrients that work together to promote:
