American Board of Medical Specialties

Patient-Centered Care

Earn MOC-4 while you launch CHADIS. A New MOC-4 "Patient-Centered Care" can be earned beginning with the planning stage of deciding which measures to use for regular check-ups and the related quality improvement process can be integrated into the CHADIS training/launch process.

Developmental and Autism Screening MOCs

CHADIS delivers Developmental and Autism screening to parents and caregivers before the visit. Once the questionnaires are completed, results and decision support are available immediately. Since CHADIS measures, tracks, and reports your results automatically, it is one of the easiest ways to earn credits toward Part 4 MOC.

Required 3-month minimum which includes:

Webinars with your CHADIS Account Manager to review CHADIS decision support tools and usage statistics.

- Submission of 30 Ages and Stages Questionnaires (ASQ-3) in CHADIS.
- Submission of 30 Modified Checklist for Autism in Toddlers-Revised (M-CHAT-R) in CHADIS.
- Administration of autism and developmental delay follow-up screens and resources.
- Completion of an Introduction to Autism educational module and test at ReThinkFirst.com.

You can go over the 3-month minimum requirement as long as you meet your deadline. You can also complete the projects simultaneously since developmental screening and autism screening are both recommended as part of the 0-3 well visit.

Advanced Asthma, Family Stress, and ADHD Care MOCs – Patient Specific Templates (PSTs)

CHADIS can help you efficiently and effectively care for patients with Asthma, ADHD, and Family Stress, based on national guidelines. CHADIS offers advanced decision support, providing dynamic templates automatically populated with pre-visit questionnaires, guiding clinicians through customized clinical steps and shared decision making, and generating needed treatment plans. PSTs provide automatically tailored post-visit 504 Plans, IEP Letters, Asthma Action Plans, notes, and other resources to parents, always accessible online.

Learn more about the Patient Specific Templates (PST) here:

Asthma PST
Family Stress PST
ADHD PST

Requires 3-month minimum which includes:

Webinars with your CHADIS Account Manager to review CHADIS decision support tools and usage statistics.
