## INFANT DROPS

### Probiotic Supplement for Colic & Digestive Support

Visbiome<sup>®</sup> Infant Drops is a multi-strain probiotic supplement designed for colic and digestive support. Visbiome Infant Drops contains the De Simone Formulation—one of the most well-studied probiotic formulations available.

#### Up To 70% Less Crying Time\*

In a double-blind, placebo-controlled study, the children assigned to Visbiome<sup>®</sup> Infant Drops reduced crying time up to 70%.\*

#### 8 Different Bacterial Strains

Visbiome<sup>®</sup> Infant drops is a precisely designed 8-strain bacteria formula. The strains are cultured from proprietary Master Cell Banks and blended using specific ratios.

#### Guaranteed Potency

Our live bacteria and oil solution come in separate compartments that must be mixed when ready to use. The drops are also shipped cold with a temperature monitor card.

#### Clinically Tested Formulation

Contains the original De Simone Formulation—which has been subject to over 70 peer-reviewed studies—making it one of the most extensively researched formulas.
