

Vaccine and Inventory Management Solutions.

Manage your entire inventory efficiently and effectively with one easy-to-use solution for vaccines, medications, samples, custom items and supplies.

AccuShelf TM by TruMed works with your existing storage equipment to provide enterprise-wide inventory control. Enhance patient safety, save time, and optimize costs with intuitive workflows and comprehensive barcode scanning. AccuShelf

provides compliant temperature monitoring, VFC reporting, EHR integration, and real-time data to deliver the ideal inventory management solution.

SIMPLIFY & STANDARDIZE WORKFLOWS

Biometric Secure Access

Streamlined Workflows

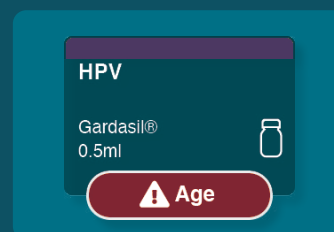

Wireless Barcode Scanning

Informative Graphical Interface

DESIGNED TO ENHANCE PATIENT SAFETY

- Improve safety and eliminate up to 91% of common vaccination errors with AccuShelf TM.
- Ensure first to expire use and prevent administering expired items with a quick scan.
- Reduce errors with EHR integration and avoid look-a-like errors with item images and vital information.
- Prior to dispensing vaccines, AccuShelf TM performs safety checks to find possible cautions.
- Improves HEDIS scores by identifying missed vaccination opportunities based on immunization schedules.

AUTOMATE YOUR VFC REQUIREMENTS

- Meet CDC and VFC temperature logging compliance with calibrated wireless digital data loggers that monitor and record temperatures from existing equipment and automatically uploads to AccuSite portal.
- Maintains accurate dose counts and usage and simplifies order management.
- Easily customize and separate inventory programs: VFC, Private, 340B, Private, etc.

ELIMINATE WASTE & LOSS

- Receive real-time alerts on temperature excursions, power outages, low inventory, and soon to expire items.
- Support stock rotation with next to expire warnings when scanning.
- Quickly reallocate stock to high demand areas with site-to-site transfers.

VFC Fridge temperature of 7.7°C (45.9°F) is near the MAXIMUM temperature of 8.0°C (46.4°F)

Cloud-based, Enterprise level inventory management & analytics with AccuSite.™

Proactive alerts via text or email include temperature excursion, and low & expiring stock.

Secure authentication with integrated biometric fingerprint reader.

24/7 customer support, warranty, and scheduled maintenance included.

ADDITIONAL OPTIONS

- **Helmer Cold Storage:** Integrated control access and auto-lock.
- **340B Support:** Capture 340B item details to track every dose by invoice, payor, and provider.
- **Reordering:** Reduce capital expenses and save hours in fulfillment time with TruMed's reordering services and on demand EDI.
- **Central Management:** Optimize central pharmacy workflows and ensure efficient stock allocation across multi-site facilities with electronic transfers and enterprise management.
- **EHR Integration:** Automatically transmit immunization orders between EHRs and AccuShelf, ensuring correct dose is dispensed and allowing accurate transcribing information.
- **Mobile Cart:** Mobile inventory workstation available.
