

We're looking for you!

Recruiting for Multiple Pediatric Positions

Children's Hospital & Medical Center, in affiliation with the University of Nebraska College of Medicine, is recruiting for multiple pediatric positions due to our significant growth. This affiliation aligns the two organizations in a way that allows a shared vision for the future of pediatric health care and ensures children have access to world-class clinical care, treatments influenced by cutting-edge research and a future generation of well-educated and highly trained medical professionals.

- Children's Hospital & Medical Center is a 225-bed nonprofit organization caring for children since 1948. Founded by the community for the community, Children's is the only full-service, pediatric specialty health center in Nebraska, providing expertise in more than 50 pediatric specialty services to children across a five-state region and beyond. As the region's pediatric healthcare leader, we're dedicated to exceptional care, advocacy, research and education.
- Our state-of-the-art Hubbard Center for Children opened in August 2021 and is home to Nebraska's only Level IV regional Newborn Intensive Care Unit, Fetal Care Center, the state's only Level II Pediatric Trauma Center and the first-in-the-region Cardiac Care Unit.
- The Child Health Research Institute, an innovative partnership between UNMC and Children's Hospital & Medical Center, was established in 2017 and aims to assist investigators with start-up funding and infrastructure for clinical, basic science or translational research.

We are looking for you! We are committed to increasing diversity in our organizations to reflect the population that we serve and encourage applications from all candidates who will contribute to the diversity and excellence of the institution. Interest and/or CVs should be directed to facultyrecruitment@childrensomaha.org.
