

Categorical Pediatric Residency Program

Children's Hospital at Montefiore

Offering a comprehensive educational program across inpatient and outpatient settings that interfaces with an incredibly diverse patient population

Through the program at Children's Hospital at Montefiore (CHAM), residents are exposed to a vast range of diagnoses, giving them ample opportunity to become comfortable with both common and complex disease processes. With all pediatric subspecialties represented, many of which are nationally ranked by *U.S. News & World Report*, CHAM residents are taught by faculty who are leaders in their fields. At our state-of-the-art children's hospital, residents are exposed to the latest in healthcare technology and research within a supportive learning environment.

CHAM faculty members are nationally and internationally recognized for their clinical and scholarly contributions to the field of pediatrics. The residency program offers a research curriculum and faculty mentorship that demystifies academic inquiry for all residents. This powerful combination has resulted in numerous residents presenting at national meetings each year, including the Pediatric Academic Societies. As a result, many residents graduate from our program with peer-reviewed journal publications on their curriculum vitae.

29 residents per year — the advantages of a large program with a family feel and focus on resident wellness.

Diverse clinical experience — inpatient, emergency, all pediatric subspecialties and primary care.

Unique curriculum — including advanced subspecialty electives, a community health rotation and focus on social determinants of health.

Located near great transit options — work and live in NYC, and experience one of the greatest cities in the world.

How to Apply

Applications are accepted through ERAS, through November 30 of the year prior to matriculation. Applicants are advised to submit applications as early as possible.
