

ABOUT OUR PROGRAMS

Pediatric Residency

Children's has partnered with academic institutions in the Omaha area to provide graduate medical education for resident physicians who need to complete postgraduate specialty training in hospital and ambulatory settings. Together, our three high-tech institutions serve an ethnically and economically diverse patient population.

Our Joint Residency Program is a partnership between three esteemed institutions:

- **Children's:** Residents will work in our freestanding hospital and learn about what it means to get to know, and communicate with, young patients and their families. They will be able to work on many types of pediatric cases, from assisting with care of a recent open heart surgery patient, to caring for children on inpatient medical floors.

Children's Physicians is the primary care pediatric group for Children's Hospital & Medical Center. We have more than 50 pediatricians, pediatric nurse practitioners, and physician assistants located in several offices throughout the Omaha metro community and Kearney, Nebraska.

- **University of Nebraska Medical Center (UNMC):** UNMC is a nationally renowned transplant center. Residents work alongside a wide range of pediatric specialists in the classic university setting — an essential part of any pediatric residency program.
- **Creighton University Medical Center (CUMC):** CUMC is affiliated with Creighton University School of Medicine. At this busy inner-city medical center, residents will receive much of their ambulatory clinic training.

For more information about our exciting pediatric residency program, please contact Cindy Colpitts, Joint Pediatric Residency Program Coordinator at 402-559-5380 or ccolpitts@unmc.edu.

Pediatric Fellowships

Children's Hospital & Medical Center, along with the University of Nebraska Medical Center Department of Pediatrics offers fellowship opportunities in several subspecialty areas. The depth and rigor of our subspecialty training, including opportunities for research, attracts talented physicians and other professionals from programs around the world. Over the next few years, we will be developing more programs. At this time, the following programs offer dynamic training for individuals seeking subspecialty training:

- Anesthesiology
- Cardiology
- Clinical Cytogenetics
- Critical Care Medicine
- Developmental-Behavioral Pediatrics
- Gastroenterology, Hepatology, Nutrition
- Genetic Medicine
- Hematology/Oncology & BMT
- Infectious Diseases
- Neonatal-Perinatal Medicine
- Pediatric Hospital Medicine
- Pediatric Ophthalmology & Strabismus
- Pediatric Palliative Medicine
- Pediatric Surgery
- Pulmonology
- Radiology
- Sleep Medicine
