

Social Pediatrics Residency Program

Promoting the health of children in underserved urban communities, train future healthcare leaders and advocate for social justice through collaborative primary care delivery, education and research.

The Residency Program in Social Pediatrics at Children's Hospital at Montefiore (CHAM) is a three-year ACGME-accredited residency program. Founded in 1970 at Montefiore, the program is designed to train pediatricians with a special interest in advocacy, health policy, social justice, and community and public health. In addition to clinical training at CHAM, Social Pediatric residents focus on the bio-psychosocial aspects of medical care, population health and community advocacy.

How to Apply

Applications are accepted through ERAS in the year prior to matriculation. This program has a separate match from the categorical pediatric program, so you must file a separate ERAS application.

Children's Hospital at Montefiore (CHAM) has been consistently recognized by *U.S. News & World Report* as one of the nation's best in areas including Pediatric Cancer, Gastroenterology & GI Surgery and Nephrology.

Clinical

- Training at CHAM for inpatient, emergency room and subspecialty training.
- Additional training working with underserved communities and community pediatrics experience at a federally qualified health center located in the South Bronx.
- Unique and diverse training working within a bio-psychosocial framework and with interdisciplinary teams in multiple settings.
- Resources of a large program with a small-program feel with outstanding faculty mentorship and strong resident-life support.

Educational

- Increased focus on ambulatory and community pediatrics including the fundamentals of public health, leadership, evidence-based medicine and community-centered advocacy and research.
- Longitudinal educational curriculum focused on individual, community and legislative advocacy.

Research

- The program provides residents with competence in understanding how research and community partnerships can improve health outcomes.
- Residents create effective advocacy initiatives with academic rigor.
