

Welcome to Guerin Children's

Philosophy of care

At Cedars-Sinai Guerin Children's, we offer comprehensive, expert-level clinical care to improve the lives of children. We treat each patient with compassion and develop a personalized treatment plan. Patients and their families enjoy a very important advantage: Our pediatric specialists provide a full range of expert care that doesn't end when children grow up. Our young patients move seamlessly to adult specialists so they can have a lifetime of uninterrupted care.

Safety and quality are paramount in our approach to pediatric care—the same high standards Cedars-Sinai is known for. Our multidisciplinary teams work hand in hand to communicate about every aspect of a child's care. Our pediatric doctors are always available to answer questions and explain treatment options in clear and understandable ways. We are also advancing leading-edge pediatric research and forward-looking doctor education and training.

New inpatient facility for children and families

Quality care in a comfortable setting is important to our youngest patients and their families. That's why we have opened a new inpatient unit built with kids in mind. The family-friendly space features:

- State-of-the-art equipment and surgical facilities, including an epilepsy monitoring room
- Furniture that converts into beds for parents and guardians who wish to stay with their child at night
- Family lounge
- Peaceful outdoor garden
- Motion-art video walls
- Interactive game room
- Movie room

Infant and newborn care at Guerin Children's

Guerin Children's expands Cedars-Sinai's already robust care in pediatrics and labor and delivery.

- Our medical center **delivers more babies than any other hospital in Los Angeles County** and can care for both moms and babies in the same place, within the same healthcare organization.
- Our world-class Level IV regional **NICU** is one of the largest in all of Southern California and unmatched in the U.S. for its innovative design and technology.
- Our continuum of care starts before birth, as our pediatric team works side by side with our **obstetricians** and **maternal-fetal medicine doctors**.

Collaborative, multidisciplinary treatment for children and adolescents

We offer the latest therapies, minimally invasive procedures and surgical techniques available in pediatric medicine. Guerin Children's is continuously adding new clinical programs to expand our network of pediatric services. A few highlights of our specialty programs at Guerin Children's include:

- Our **Pediatric Congenital Heart Program** is part of the world-renowned Smidt Heart Institute and offers advanced, sophisticated care and treatment to children and adults born with heart defects.
- Our **Pediatric Orthopaedics and Spine programs** treat children and adolescents with a range of common and complex spine conditions, including scoliosis and other back problems.
- Our dedicated **Pediatric Neurology and Neurosurgery programs** treat a range of brain diseases in children and adolescents, including brain tumors, congenital malformations of the brain and spine, stroke, and cerebrovascular malformations.

Specialized pediatric services

Whether a child needs routine care or a complex surgical procedure, we offer many pediatric services across our network of affiliate hospitals and specialize in treating a wide range of conditions.

At Guerin Children's, our full list of **pediatric services** includes:

- Adolescent Gynecology
- Adolescent Medicine
