

Integrating ASQ into Electronic Health Records

There are currently several options for health care providers interested in integrating the Ages & Stages Questionnaires®, Third Edition (ASQ®-3), and Ages & Stages Questionnaires®: Social-Emotional, Second Edition (ASQ:SE®-2) into electronic health records (EHRs), also known as electronic medical records (EMRs).

- Automated transfer of data between Brookes Publishing’s [ASQ Online management system](#) and EHR with Application Programming Interface (API)
 - Requires subscription to ASQ Online
 - View information and pricing at www.agesandstages.com/asq-online-api
- Manual export of ASQ-3 and/or ASQ:SE-2 scores from Brookes Publishing’s [ASQ Online management system](#) and import into EHR
 - Requires subscription to ASQ Online
 - Alternate child ID field in ASQ Online would match child’s ID in EHR
- Licensing to integrate ASQ-3 and/or ASQ:SE-2 questionnaire content into EHR
 - Pricing varies based on practice size, planned functionality, and other factors
 - For information, contact your sales representative at www.agesandstages.com/contact-us
- Scan completed ASQ-3 and/or ASQ:SE-2 Information Summary Sheets and attach to a child’s record in EHR
 - Does not require subscription to ASQ Online
 - Does not require a license or permission from Brookes Publishing
- Enter only ASQ-3 and/or ASQ:SE-2 scores, or item responses, into fields in a child’s record in EHR
 - Does not require subscription to ASQ Online
 - Does not require a license or permission from Brookes Publishing, as long as the questions and/or illustrations from the questionnaires (or portions thereof) are NOT reproduced in EHR
- Subscribe to [Phreesia](#), a suite of applications to manage the patient intake process. Pediatric practices can electronically administer the ASQ®-3 (English and Spanish), and scores are automatically calculated and exported directly into patients’ electronic health records for better screening reliability and consistency. Phreesia is integrated with a number of PM/EHR systems, including Allscripts, Athena, Cerner, eClinicalWorks, eMDs, Epic, Greenway, Meditech, Modernizing Medicine, NextGen, Office Practicum, and Virence.
- Subscribe to [CHADIS®](#), the Child Health and Development Interactive System, a comprehensive web-based screening, diagnosis, and management system. CHADIS offers web-based ASQ-3 and ASQ:SE-2 (English and Spanish) questionnaire completion, automatic questionnaire scoring, and time-based graphical displays. CHADIS is integrated with Office Practicum, Allscripts TouchWorks, Allscripts Professional, athenaNet, and eClinicalWorks, and interoperability with Epic is available on a site-by-site basis.
- Subscribe to [Patient Tools®](#) (PTI), an enterprise solution for electronic patient interviews for all age groups and specialties. PTI offers tablet (e.g., iPad, Android) and web-based ASQ-3 and ASQ:SE-2 questionnaire (English, Spanish, Hmong, and Somali) completion, scoring, trending across ASQ age groups, and in-depth reporting in real-time. PTI’s Data Exchange can be configured to interface to any EHR using HL7, ODBC, or file-based transfers of reports and discrete data fields.
