

TRUSTED. POWERFUL. CONSISTENT.

WHAT IS HYDROZID®?

- Hydrozid is a FDA registered device for the treatment of 17 types of skin lesions.
- Hydrozid provides clinicians the power in an easy to use, off the shelf system, while offering precision and minimal patient discomfort.
- Hydrozid has been used in Europe by licensed providers in multiple specialties since 2013 and was cleared for use in the United States in 2021.
- Unlike other cryosurgery products, Hydrozid utilizes a single gas which requires no special ventilation or handling, and provides consistent temperature control.
- The light weight, transportable canister has a three year shelf life from manufacturing and can be disposed of as normal waste.
- Hydrozid is restricted to sale and use only by licensed medical professionals.
