CITI PROGRAM

Supplemental Courses for Research Administrators

Many organizations subscribe to our *Essentials of Research Administration*, *Human Subjects Research*, and *Good Clinical Practice (GCP)* courses for their foundational training in core research concepts. To supplement this training, CITI Prgram offers additional content covering key concepts like quality assurance and protocol review. This additional content expands on core training and provides advanced learning opportunities for current and aspiring research administration professionals.

IACUC Administration

This course provides a comprehensive review of IACUC administration, including the IACUC administrator's specific roles and responsibilities in an animal care and use program.

IACUC Protocol Review

This course provides practical guidance on how to conduct protocol reviews in keeping with the current regulatory requirements and related guidance documents.

Semiannual Evaluations In Depth

This course provides IACUC members and administrators with more in-depth information about the conduct of semiannual evaluations.
