

Aria Free™ Empowers Patients

Freedom and flexibility for the millions facing the burdens of treating lymphedema and other chronic edema.

By removing barriers to therapy, and providing a lightweight, easy-to-use, at-home device with virtual support, we can help people manage lymphedema symptoms and improve health outcomes.

“Aria Free is very portable for moving about the house or apartment and it is easy to set up and use. This again goes to compliance and acceptance.”

*Dr. Harvey Mayrovitz,
Nova Southeastern University*

Why patients don't comply with therapy

Today's cumbersome devices and bulky garments keep people tethered and isolated for hours. They struggle with therapy, saying there's no easy way to disconnect for a quick break. Others require help putting the garment on. And one mother said, “When my son saw me wearing it, he asked me if I was going to die.”¹

Aria Free is different

Simple, comfortable, and incredibly portable, Aria Free helps improve compliance and satisfaction.

Easy to fit. Easy to use.

The system includes a smartphone-sized pneumatic compression pump and a streamlined garment made of skin-friendly fabric. Together, they deliver gentle gradient pressure that encourages lymph flow and reduces swelling.²

Aria Health is an accredited HME supplier

- Contactless delivery
- Setup assistance
- Free customer support for the life of the product
- Shipping to 27 states + DC, covering 60% of US pop.
- Service to rural and underserved areas
- ACHC accreditation

Backed by ResMed

One of the few connected devices in this market, Aria Free was developed in association with ResMed, leveraging the global company's expertise in health technology and cloud-connectable devices.
