

**UNIQUE FEATURES & BENEFITS OF
SAFERSONIC ULTRASOUND TRANSDUCER COVERS**

SAFERSONIC Ultrasound Transducer Covers are new technology. They offer the first innovation in this product category in over thirty years. Safersonic ultrasound transducer covers are unique in that only our transducer cover can provide the clinician and your institution with these benefits:

- ✓ **Reduce the Potential for Infection!**
 1. Use a product designed as a probe cover and not as a bandage.
 2. Reduce the potential for injection site--catheter site contamination.

→ The patient and the transducer are protected.
- ✓ **Save Time and Money! With Safersonic You Have Faster set-up time! With Safersonic You Have Faster Turnaround Time after Procedure!**
 1. No Rubber bands to wind or unwind around the ultrasound transducer.
 2. No exposure to clinicians of biological contamination during cover removal.
 3. No need to clean gel from the transducer and cable.
 4. No need to remove messy adhesive from the transducer (if you used a semi-occlusive dressing as a probe cover).
 5. Our acoustic coupling window does not leave any sticky residue!

→ The ultrasound transducer can be quickly prepared for the next case!
- ✓ **Elimination of the layer of gel under the Safersonic Sterile Transducer Cover!**
 1. Reduce the potential for artifacts due to air trapped in the gel. .
 2. Eliminate the possibility of image loss due to gel migration during long cases.
 3. Improve acoustical clarity allowing better visualization of anatomical structures.

→ The ability to perform procedures faster with greater accuracy.
- ✓ **Reduction in potential damage to the transducer from the cleaning process, which is especially important since:**
 1. A new transducer can cost over \$10,000.
 2. The damage assessment process can result in the equipment being unavailable for several weeks.
- ✓ **Reduction in acquisition costs as Safersonic ultrasound transducer covers have a larger quantity of product in every box.**
- ✓ **Reduction in environmental impact as Safersonic ultrasound transducer covers have a larger quantity of product in every box.**
