

EXPERTISE

Since 1976, successful medical practices have relied on StreamlineMD's service, technology and expertise to maximize revenue and profitability. From certified coders and insurance experts to software and IT engineers, we have the dedicated team of professionals that you can depend on for all your medical billing needs. Our organization is unusual in that we are payer centric. This structure facilitates an extraordinary understanding of each payer's specific and ever-changing rules and requirements. Let StreamlineMD's billing experts help you **GET PAID FASTER**.

OVERSIGHT

The physicians' time is the only engine of revenue in your practice. The income lost to the time spent by physicians overseeing a billing operation, can often be as costly as the billing staff itself. Moreover, with only one or two dedicated billing people, how does a practice establish an effective system of checks and balances? Let Streamline Billing Services provide the **CHECKS AND BALANCES** you need to improve your billing performance.

REDUNDANCY

If your billing operation ceases to operate, your cash flow will come to an end in a matter of weeks. A one or two person billing staff does not offer you sufficient redundancy, and as such is a threat to your business. Streamline Billing is a solution to this vulnerability. Our cross-trained team of billing experts will **KEEP CASH FLOWING** to your practice without the interruptions typically experienced with in-house billing operations due to vacations, sickness, or employee turnover.

PERFORMANCE BASED COST

In these uncertain times, businesses are looking for ways to maximize revenue and minimize their fixed costs. When a physician goes on vacation, becomes ill or suffers a reduction of income due to lower patient volumes or decreased reimbursement, the cost of an in-house billing operation does not decrease commensurately. With Streamline Billing, your **COST IS BASED ON WHAT WE COLLECT FOR YOU**. If your revenues temporarily drop or cease all together, the cost of our services will be reduced proportionately.

Your practice is a business and we can be a valuable business partner.
