AlayaCare

Home infusion software to streamline your operations and propel growth

Serving the needs of:

- Specialty pharmacies
- Home infusion nursing agencies
- Mobile IV hydration
- Hospital health systems
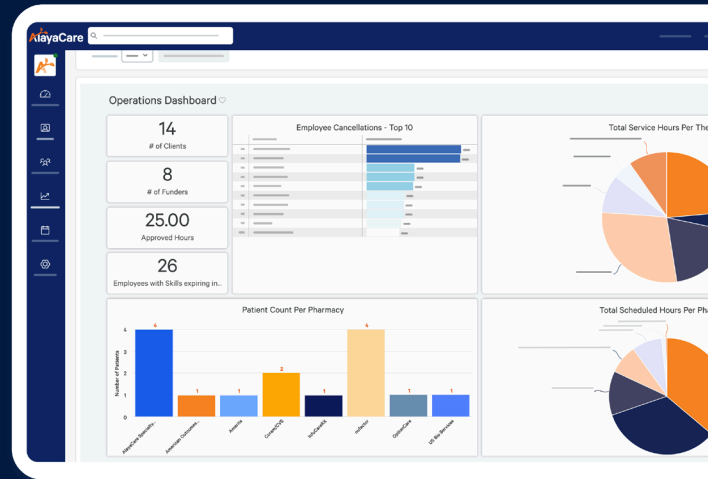

Delivering better outcomes across the home and specialty infusion industry

End-to-end functionality
Handle multiple office or clinic operations in one system built with end-users in mind and optimized for all devices

Responsive mobile app
Point of care documentation, GPS & time stamped visit verification, clock in & clock out, offline mode

Flexible integrations & APIs
Directly integrate with your existing platforms such as pharmacy management and health information systems

Reporting
Track patient outcomes, measure nursing operations, pharmacy management, and reimbursements with customized real-time dashboards

Clinical document & treatment planning
Equip staff to document pre- and post-infusion data on mobile with our custom form builder and templates

Scheduling
Schedule and route optimization for better client-staff fit for nurses or subcontractors

Referral Marketplace
Send and receive digital referrals with verified providers to eliminate manual processes and solve staffing short ages

Patient engagement
Keep patients, families, and care teams securely connected across the continuum of care.

"
There's lots of challenges in remote clinical situations. AlayaCare allows for flexible adaptation to how home infusion worked historically and how it's changing today."

– Brett Michalak, CIO

We partner with you to combat ongoing nursing shortage

Amidst the increasing demand for infusion services, our trusted nursing referral network, AlayaCare Marketplace, lets you effortlessly send, receive, and track visit referrals across multiple organizations in your local communities.

Supply

Demand
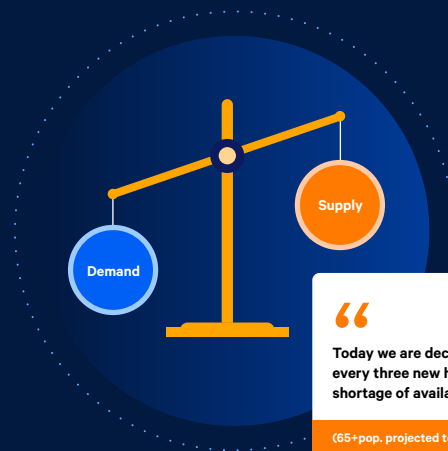

> "Today we are declining nearly two out of every three new home care cases due to shortage of available caregivers."

(65+pop. projected to double by 2060)

85%
reduction in paper use and 40% reduction in errors related to the use of paper

40%
decrease in infusion billing processing time, yielding a savings of 30 minutes per invoice

35%
reduction in home care travel costs via advanced algorithms that continuously optimize routes and schedules for thousands of employees

50-60%
reduction in administrative costs related to scheduling, tracking users and entering data into multiple systems

We help keep you compliant, while helping improve patient outcomes

Don't let Electronic Visit Verification (EVV) regulations complicate your operations. AlayaCare makes it easy to capture and send GPS- and time-stamped visit data, simplifying the compliance process for your entire team. This not only keeps your organization compliant but also guarantees that your patients receive the exceptional care they deserve

✅ Task Complete

Join 750+ organizations leveraging AlayaCare to streamline processes, enhance efficiencies, and achieve superior patient outcomes.
