

The Easiest Way to Implement Precision Dosing

Calculating an individualized dose can be time consuming. With DoseMeRx, you can make confident dosing decisions in seconds.

dosemehealth.com

DoseMeRx is a precision dosing platform developed specifically for clinical practice to optimize dosing, streamline workflow, reduce adverse drug events, decrease costs, and improve patient outcomes.

Achieve your clinical and operational goals with DoseMeRx

Save Time

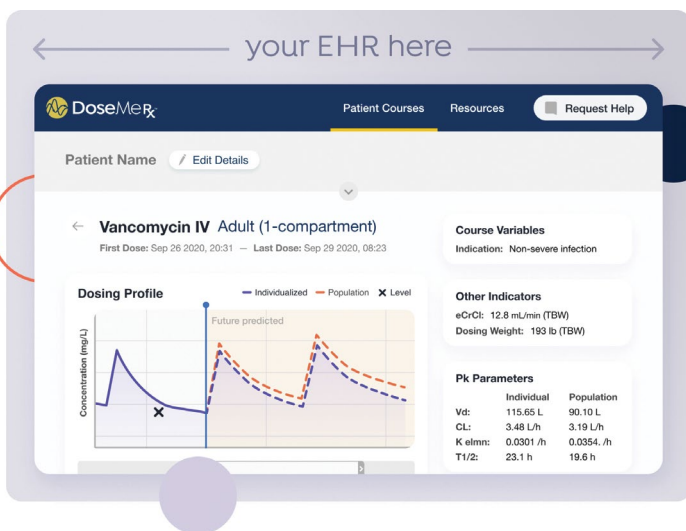

-  Instant access to the web-based solution
-  Patient data automatically loaded in integrated solutions
-  Calculate an area under the curve (AUC) dose recommendation in seconds

Flexible Timing of Drug Levels

-  Just one drug level required to calculate an AUC
-  Drug levels can be taken at any time
-  Halve the number of assays required

Decrease Clinical Variation

-  Data-driven approach to dose optimization
-  Increased proportion of patients in therapeutic range
-  Decreases mortality, risk, and adverse drug events

Access DoseMeRx anytime and on every device

DoseMeRx is available online for your convenience as a web-based solution. Interested in integrating into your electronic health system? DoseMeRx runs seamlessly in all major EHR and pharmacy surveillance platforms.

Why DoseMeRx?

24/7, 365 Support

With offices in the United States and Australia we offer round the clock support. No matter the time, day or night, we're here for you! Someone from our dedicated customer experience team will always be available to help.

Experienced & Trusted

Healthcare providers around the globe trust DoseMeRx. Thousands of clinicians, across hundreds of locations worldwide, rely on DoseMeRx to optimize dosing for their patients.

Safe & Secure

We have a team of experts monitoring DoseMeRx in accordance with stringent medical device and software guidelines. Our platform is fully HIPAA, HITRUST, ISO, and FDA compliant, so you can rest assured your data is always safe with us.

Easy-to-use

Leave the complicated spreadsheets behind you! DoseMeRx combines smart technology with science, leveraging clinically-validated PK/PD models, patient characteristics, drug concentrations, & genotype to accurately individualize a dose in seconds.

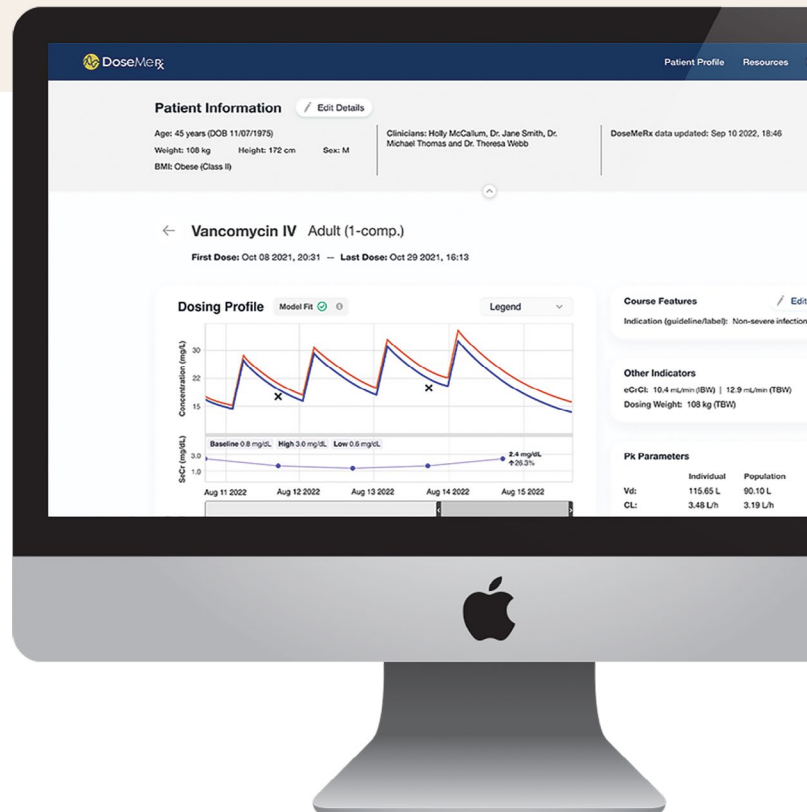

Simple to learn

Learning DoseMeRx is easy! With live training and support offered on all of our plans, you and your team can be up and running in minutes.

Safe and effective dosing for a wide range of drugs

DoseMeRx offers 42 clinically validated drug models across various therapeutic areas including infectious disease, transplant medicine, cardiovascular & coagulation management, oncology, pediatrics, & more.

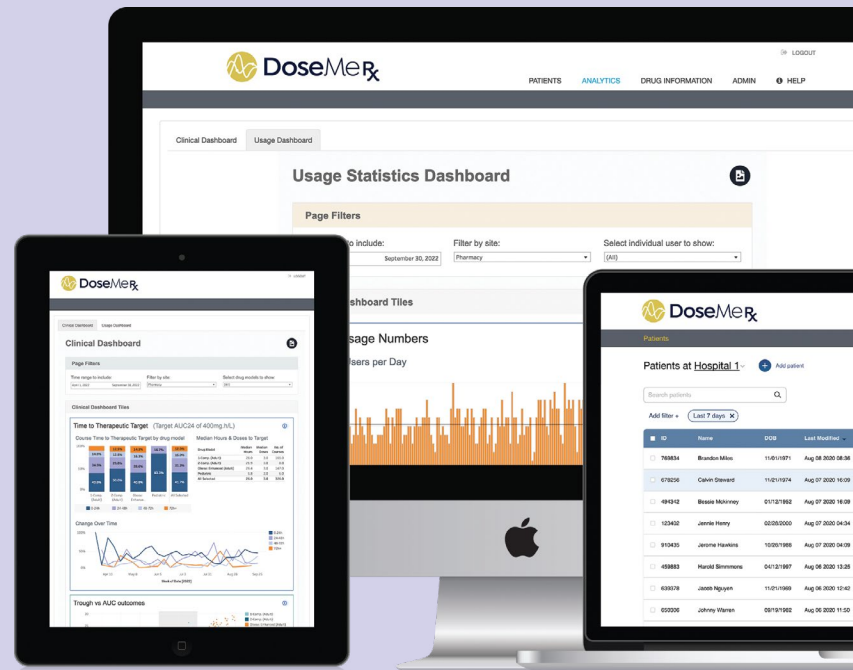

"It's a straight-forward way to implement AUC-based dosing whilst at the same time minimizing the number of levels needed. It's a win, win... DoseMeRx solves my need."

William L. Musick PharmD., BCPS
Infectious Diseases Clinical Specialist | Houston Methodist

Leverage real-time clinical and usage data

Drive productivity and improve efficiencies with DoseMe Analytics, available right inside DoseMeRx. Gain insight into clinical outcomes and dosing practices with interactive visualizations, including trough vs. AUC outcomes, patient risk indicators, and more.
