Inovalon®

ScriptMed® Infusion

Optimize pharmacists' time so they can focus on patient care

ScriptMed® is the next-generation, end-to-end software solution that eliminates the need for multiple systems to support pharmacy operations. Its secure, scalable design automates manual tasks for specialty infusion, home infusion, site of care management, scheduling, and much more.

Powered by the Inovalon ONE® Platform, ScriptMed simplifies the entire infusion pharmacy workflow to provide a better patient experience and **an estimated cost to serve savings up to 17%.**[1]
Empowered by DataStream

Access a comprehensive and actionable view of patient health history with access to longitudinally linked data across specialties. DataStream tailors insights to specific workflows to enable faster, more personalized care decisions for patients.

Advantages for your organization

1 Eliminate the need for multiple applications with the premier-native end-to-end system.

2 Operate at scale using the only software solution in the market with configurable, persona-based workflows.

3 Gain real-time access to the industry's largest primary source dataset.

4 Achieve technology and reporting requirements to access Payer Preferred Pharmacy Networks and LDDs.

End-to-end capabilities:

| Referral Management | Clinical Management | Order Management | Order Fulfillment | Inventory Management | Contract Management | Revenue Cycle | Reporting & Visualization |

Infusion-specific features:

Clinician scheduling, documentation, and billing
Handle all aspects of clinician and location coordination within one familiar and consistent interface.

Benefit eligibility and billing automation
Dramatically reduce sources of delays and get patients started on treatment sooner.

Complex compounding management
Manage and create compound drugs and item profiles for rapid and accurate deployment.

Clean Room Quality Management
Seamlessly create and support entity level facility assessments within the ScriptMed application.

Total parenteral nutrition (TPN) management
TPN management removes the guess work and saves time with automatic dosing concentrations and volumes.

Persona-driven workflow
Designed to optimize staffing by driving the right work to the right user at the right time.

DME pump and service management
Take the guesswork out of ongoing DME pump management, and easily track sales, rentals, and maintenance.
